

## Acknowledgments

This report was prepared by CASAS for state and federal program accountability. We are grateful to the personnel in ABE 321/326 funded agencies in California who collected information from and administered tests to learners enrolled in many diverse educational programs. This report was made possible through their diligence and cooperation.

The members of the Data and Accountability Work Group, convened by the California Department of Education, deserve a special thank you for their dedication and commitment to this project throughout the year. Their foresight was invaluable for predicting the information necessary for state and federal program accountability needs and for providing field-based suggestions for assisting agencies with the data collection process. They assisted in the development of the data elements, data collection forms, uniform definitions, and identified training needs. In addition, this work group provided suggestions for reporting of the data to students, instructors, administrators, community groups, and legislators. The members of this Data and Accountability Work Group include staff from CDC and Field-based representatives. The California Department of Education Staff includes Joan Polster, Manager, Adult Education Office and Richard Stiles, Project Monitor, Adult Education Office. The field-based representatives include Noreen Hanna, Principal, Napa Adult School, Napa Valley Unified School District; Sue Lytle-Gilmore, Principal, Fremont School for Adults and A. Warren McClaskey Adult Center, Sacramento City Unified School District; Lanny Nelms, Principal, Friedman Occupational Center, Los Angeles Unified School District; Irv Rem, Assistant Superintendent, Hacienda-La Puente Unified School District and Sandra Steiger, Principal, Milpitas Adult Education Programs, Corrections Education Programs, Milpitas Unified School District.

We would also like to thank the Staff Development Institute (SDI), Outreach and Technical Assistance Network (OTAN), and the CASAS trainers for their collaborative efforts to provide training to agency representatives statewide. SDI provided outstanding trainers and was instrumental in scheduling the training sessions. Both SDI and OTAN were partners in the development of the training video tape provided to every ABE 321/326 agency. Their efforts are appreciated and contributed to the successful implementation of data collection procedures.

The report analysis was designed and written by a team at CASAS composed of: Zoë Abrahams, Lori Coogan, Dawn English, Andrew Evans, Dennis Johnston, Teri Merry, Jennifer Miller, and Pat Rickard. The report cover design was created by Zoë Abrahams. The graphics and layout were designed by Sallie Saltzman. Ardis Breslauer, Autumn Keltner, Linda Taylor, Nancy Taylor, and Pat Rickard edited the report. Anne Marie Howard Steinberger oversaw production.

This report was completed because of the hard work, dedication, and professionalism of all Data and Accountability Work Group and CASAS team members. Their efforts are truly appreciated.

# Table of Contents

Executive Summary .....	<i>i</i>
<b>Chapter One: Introduction: An Overview of Adult Basic Education in California .....</b>	<b>1</b>
<b>BACKGROUND .....</b>	<b>1</b>
Federal ABE 321/326 Grants .....	1
California ABE 321/326 Programs .....	1
About CASAS .....	1
<b>LEARNER POPULATION AND DATA COLLECTION METHODS .....</b>	<b>2</b>
Total Enrollment Population .....	2
Local Agencies .....	3
Local Testing Agencies .....	4
Local Special Education Learners .....	4
State Agencies .....	5
Data Collection Forms .....	5
<b>METHODOLOGY .....</b>	<b>5</b>
Local Agencies .....	5
Local Testing Agencies .....	5
Special Education Learners .....	6
State Agencies .....	6
<b>REPORT OVERVIEW .....</b>	<b>6</b>
Changes from Previous Reports .....	6
Chapter Contents .....	6
<b>Chapter Two: Program and Learner Information for the Total Enrollment Population: Who are our Learners and in What Types of Programs do They Enroll? .....</b>	<b>9</b>
<b>PROGRAM INFORMATION .....</b>	<b>10</b>
Provider Type .....	10
Instructional Program .....	11
Instructional Level .....	13
<b>LEARNER INFORMATION .....</b>	<b>19</b>
Gender .....	20
Age .....	20
Ethnic Background .....	21
Highest Degree Earned .....	23

<b>Chapter Three: Program and Learner Information for the Local Agency Population: Who Participates in Adult Education Through Local Agency Providers? .....</b>	<b>25</b>
<b>PROGRAM INFORMATION .....</b>	<b>25</b>
Instructional Program .....	25
Instructional Levels .....	26
<b>LEARNER INFORMATION - SPECIAL PROGRAMS AND REASONS FOR ENROLLMENT .....</b>	<b>27</b>
Special Programs .....	27
Reasons for Enrollment .....	28
<b>Chapter Four: Goal Attainment Information for Local Agency Learners: What Changes Occurred for Learners? .....</b>	<b>31</b>
<b>GOAL ATTAINMENT INFORMATION .....</b>	<b>32</b>
Learner Enrollment Status .....	32
Learner Progress .....	34
Learner Results .....	36
Reason for Leaving Early .....	40
<b>Chapter Five: Learner Profile of the Local Testing Population: How Well Does the Local Testing Population Represent the Total Local Population? .....</b>	<b>45</b>
<b>REPRESENTATIVENESS OF THE LOCAL TESTING POPULATION .....</b>	<b>45</b>
Sampling Procedure .....	45
Program Information .....	45
Demographics .....	47
Reasons for Enrollment, Learner Progress, and Learner Results .....	47
<b>Chapter Six: Test Scores and Learner Gains for the Local Population: What Improvement Was Seen In Learners? .....</b>	<b>51</b>
<b>TEST SCORES AND LEARNING GAINS .....</b>	<b>51</b>
Pretest Scores .....	51
CASAS Scores .....	51
Learning Gains .....	55
Assessment Results by Provider Type .....	62
<b>Chapter Seven: Program Services for the Total Population: What Program Characteristics Were Evidenced by Learners? .....</b>	<b>65</b>
<b>PROGRAM SERVICES .....</b>	<b>65</b>
Time of Day Class Met .....	65
Class Size .....	66
Weekly Hours of Instruction .....	66
Classroom Support .....	68
Emphasis of Classroom Instruction .....	71
Primary Instructional Setting .....	72
Primary Physical Setting .....	73

<b>Chapter Eight: What Was the Program, Learner, and Goal Attainment Information for the State Agency Population? .....</b>	<b>75</b>
<b>BACKGROUND .....</b>	<b>75</b>
State Agencies .....	75
<b>PROGRAM, LEARNER, AND GOAL ATTAINMENT INFORMATION .....</b>	<b>76</b>
Program Information .....	76
Learner Information .....	77
Goal Attainment .....	81
<b>Chapter Nine: What Was the Program, Learner, and Goal Attainment Information for the Special Education Population? .....</b>	<b>85</b>
<b>PROGRAM INFORMATION .....</b>	<b>85</b>
Provider Type .....	85
<b>LEARNER INFORMATION .....</b>	<b>86</b>

Learning Gains .....	90
<b>Chapter Ten: Implications of Report Results for Future Data Collection Efforts .....</b>	<b>91</b>
<b>Appendix A: A Description of the Local Sample Selection Process</b>	
<b>Appendix B: Instructional Questionnaire</b>	
<b>Appendix C: Total Enrollment Population Data</b>	
<b>Appendix D: Local Agency Population Data</b>	
<b>Appendix E: Local Testing Population Data</b>	
<b>Appendix F: Geographical Region Data</b>	
<b>Appendix G: State Agency Population Data</b>	
<b>Appendix H: Special Education Population Data</b>	

## *List of Tables*

### **Chapter One**

1.1 - Local Agencies .....	3
1.2 - Local Testing Agencies .....	4
1.3 - Local Special Education Learners .....	4
1.4 - State Agencies .....	5
1.5 - Population for Each Report Chapter .....	7

### **Chapter Two**

2.1 - Percentage of Learners Served by Each Provider Type from 1993 to 1998 .....	10
2.2 - Total Enrollment Population: Instructional Program (1993-94 to 1997-98) .....	12
2.3 - Percentage of Learners at Each Instructional Level Within Each Provider Type (1997-98) .....	18
2.4 - Percentage of Learners Within Each Provider Type Representing Each Ethnic Group (1997-98) .....	22
2.5 - Total Enrollment Population: Highest Degree Earned by Provider Type (1997-98) .....	23

### **Chapter Three**

3.1 - Percentage of Learners in the Local Population Enrolled in Special Programs (1997-98) .....	28
3.2 - Percentage of ABE Learners Indicating Primary and Secondary Reasons for Enrollment (1997-98) .....	28
3.3 - Percentage of ESL Learners Indicating Primary and Secondary Reasons for Enrollment (1997-98) .....	29
3.4 - Percentage of ESL-Citizenship Learners Indicating Primary and Secondary Reasons for Enrollment (1997-98) .....	29

### **Chapter Four**

4.1 - Local Agency Population (1997-98) and Local Testing Population (1996-97):Two Year Comparison of Learner Enrollment Status for Each Instructional Program .....	34
4.2 - Percentage of Learners Within Each Enrollment Category Experiencing a Particular Outcome During the Instructional Period (1997-98) .....	38
4.3 - Percentage of Respondents Citing Different Reasons for Leaving Instructional Program Prior to Completion by Sex (1997-98) .....	43
4.4 - Percentage of Respondents Citing Different Reasons for Leaving Instructional Program Prior to Completion by Age (1997-98) .....	44

### **Chapter Five**

5.1 - Local Testing Population: Provider Type (1997-98) .....	46
---	----

## Chapter Six

6.1 - Mean Reading Pretest Scores Across Each Instructional Program for the 1997-98 Testing Population .....	52
6.2 - Mean Math Pretest Scores at Various Levels of the CASAS Scale for the 1997-98 ABE Testing Population .....	53
6.3 - Mean Listening Pretest Scores at Various Levels of the CASAS Scale for the 1997-98 ESL and ESL-Citizenship Testing Population .....	54
6.4 - Mean Reading Learning Gains Across and Within Program Type (1997-98) .....	56
6.5 - Mean Reading Learning Gains by Years of Education for ESL and ESL-Citizenship Learners (1997-98) .....	57
6.6 - Average Listening Learning Gains for ESL Learners (1997-98) .....	57
6.7 - Mean Reading Learning Gains for the ABE Sample (1993-94 to 1997-98) .....	58
6.8 - Mean Reading Learning Gains for the ESL Sample (1993-94 to 1997-98) .....	59
6.9 - Mean Reading Learning Gains for the ESL-Citizenship Sample (1993-94 to 1997-98) .....	60
6.10 - Mean Listening Learning Gains for the ESL Sample (1993-94 to 1997-98) .....	61
6.11 - Mean Reading Pretest Scores Across Provider Type for the ABE Sample (1993-94 to 1997-98) .....	62
6.12 - Mean Reading Pretest Scores Across Provider Type for the ESL Sample (1993-94 to 1997-98) .....	62
6.13 - Mean Listening Pretest Scores Across Provider Type for the ESL Sample (1993-94 to 1997-98) .....	63
6.14 - Mean Reading Pretest Scores Across Provider Type for the ESL-Citizenship Sample (1995-96 to 1997-98) .....	63

## Chapter Seven

7.1 - Percentage of Classes Within Each Provider Type Held at Different Times of the Day (1997-98) .....	66
--	----

## Chapter Eight

8.1 - Gender and Age Distributions Among ABE 321/326 State Agency Learners (1997-98) .....	78
8.2 - Percentage of State Agency Learners Reporting Various Outcomes Across Each Provider Type (1997-98) .....	82
8.3 - ABE Reading Pretest Scores Across Each Provider Type (1997-98) .....	83

## Chapter Nine

9.1 - Percentage of Special Education Learners by Gender and Age Group (1997-98) .....	87
9.2 - Interpreting CASAS Special Education Scores .....	90
9.3 - Special Education Population Mean Reading Pretest Results (1997-98) .....	90

**Appendix A: A Description of the Local Sample Selection Process**

**Appendix B: Student Entry/Update Record, Student Test Record, and Instructional Questionnaire**

**Appendix C: Total Enrollment Population Data**

- C-1 - Total Enrollment Population Learner Gender by Provider Type (1997-98)
- C-2 - Total Enrollment Population Learner Age (1993-94 to 1997-98)
- C-3 - Total Enrollment Population Learner Age by Provider Type (1997-1998)
- C-4 - Total Enrollment Population Learner Ethnicity (1993-94 to 1997-98)
- C-5a - Total Enrollment Population Learner Language (1997-98)
- C-5b - Total Enrollment Population Learner Language by Provider Type (1997-98)
- C-6 - Total Enrollment Population Instructional Program by Highest Degree Earned (1997-98)
- C-7 - Total Enrollment Population Instructional Education (1993-94 to 1997-98)

**Appendix D: Local Agency Population Data**

- D-1 - Learner Results by Secondary Reasons for Enrollment (1997-98)

**Appendix E: Local Testing Population Data**

- E-1 - Local Sample and Local Total Instructional Level (1997-98)
- E-2 - Local Sample and Local Total Learner Gender and Age (1997-98)
- E-3 - Local Sample and Local Total Highest Degree Earned (1997-98)
- E-4 - Local Sample and Local Total Ethnicity (1997-98)
- E-5 - Local Sample and Local Total Years of Education (1997-98)
- E-6 - Local Sample and Local Total Native Language (1997-98)

**Appendix F: Geographical Region Data**

- F1 - Regional Distribution Local Agency Learners (1997-98)
- F2 - Instructional Program by Region (1997-98)
- F3 - Instructional Level by Region (1997-98)
- F4 - Provider Type by Region (1997-98)
- F5a - Learner Demographics by Region (1997-98)
- F5b - Learner Demographics by Region (1997-98)
- F6 - Reasons for Enrollment by Region (1997-98)
- F7 - Learner Progress and Results by Region (1997-98)
- F8 - Distribution of Reading Pre-Test Scores by Region (1997-98)

**Appendix G: State Agency Population Data**

- G1 - State Agency Population Instructional Program by Provider Type (1997-98)
- G2 - State Agency Population Ethnicity and Native Language by Provider Type (1997-98)
- G3 - State Agency Population Highest Degree Earned, Years of Education, Primary Reason for Enrollment, and Progress by Provider Type (1997-98)
- G4 - State Agency Population Test Scores and Learning Gains by Provider Type (1997-98)

**Appendix H: Special Education Population Data**

- H1 - Special Education Population Learner Demographics (1997-98)
- H2 - Special Education Population Highest Degree Earned, Years of Education, Secondary Reason for Enrollment, and Progress (1997-98)
- H3 - Special Education Population Test Scores and Learning Gain by Reading Level (1997-98)

## *List of Figures*

### **Chapter One**

- 1.1 - The California ABE 321/326 Population ..... 3

### **Chapter Two**

- 2.1 - Total Enrollment Population: Distribution of Learners by Instruction Program (1997-98) ..... 11
- 2.2 - Percentage of Learners in Each Instructional Program Served by Each Provider Type (1997-98) ..... 12
- 2.3 - Percentage of ABE Learners at Each Instructional Level When Entering Program (1997-98) ..... 13
- 2.4 - Percentage of ESL and ESL-Citizenship Learners at Each Instructional Level When Entering Program ..... 14
- 2.5 - ESL-Citizenship Instructional Level Trends (1995-96 to 1997-98) ..... 15
- 2.6 - ESL Instructional Level Trends (1995-96 to 1997-98) ..... 16
- 2.7 - ABE Instructional Level Trends (1995-96 to 1997-98) ..... 17
- 2.8 - Total Enrollment Population: Learner Gender (1992-93 to 1997-98) ..... 19
- 2.9 - Percentage of Learners Within Each Instructional Program Categorized by Age ..... 20
- 2.10 - Percentage of Learners Within Each Instructional Program Categorized by Ethnicity ..... 21

### **Chapter Three**

- 3.1 - Local Agency Population: Distribution of Learners by Instructional Program (1997-98) ..... 26
- 3.2 - Percentage of ABE Learners at Each Instructional Level When Entering Program ..... 26
- 3.3 - Percentage of ESL and ESL-Citizenship Learners at Each Instructional Level When Entering Program (1997-98) ..... 27

### **Chapter Four**

- 4.1 - Local Agency Population: Distribution of Learners by Learner Enrollment Status (1997-98) ..... 32
- 4.2 - Local Agency Population: Enrollment Status of Learners Within Each Instructional Program (1997-98) ..... 33
- 4.3 - Percentage at Each Level of Progress Among Learners Remaining in an Instructional Program at Student Update (1997-98) ..... 35
- 4.4 - Percentage of Learners Within Each Instructional Year at Various Levels of Progress ..... 35
- 4.5 - Percentage of Learners Within Each Instructional Program at Each Level of Progress (1997-98) ..... 36
- 4.6 - Percentage of Learners Who Experienced a Particular Outcome During the Instructional Period (1997-98) ..... 37
- 4.7 - Percentage of Learners Within Each Instructional Program Experiencing a Particular Outcome During the Instructional Period (1997-98) ..... 39
- 4.8 - Percentage of Respondents Citing Different Reasons for Leaving Instructional Program Prior to Completion (1997-98) ..... 41
- 4.9 - Percentage of Respondents Citing Different Reasons for Leaving Instructional Program Prior to Completion Within Each Instructional Program (1997-98) ..... 42

**Chapter Five**

5.1 - Local Testing and Total Local Population: Distribution of Learners by Instructional Program (1997-98) ..... 46

5.2 - Percentage of Learners in Each Population Reporting Their Primary Reason for Enrollment (1997-98) ..... 47

5.3 - Percentage of Learners in Each Population at Various Levels of Progress (1997-98) ..... 48

5.4 - Percentage of Learners in Each Population Who Experienced a Particular Outcome During the Instructional Period (1997-98) ..... 49

**Chapter Six**

6.1 - Comparison of Mean Reading Pretest Scores Across Instructional Programs for the 1997-98 Testing Population ..... 53

6.2 - Comparison of Mean Listening Pretest Scores for the 1997-98 ESL and ESL-Citizenship Testing Population ..... 55

**Chapter Seven**

7.1 - Average Hours of Weekly Instruction Across Provider Type Held at Different Times of the Day (1997-98) ..... 67

7.2 - Percentage of Classes Within Each Provider Type Having Instructional Support (1997-98) ..... 68

7.3 - Percentage of Classes Within Each Provider Type Using Computers as Part of the Learning Experience (1997-98) ..... 69

7.4 - Percentage of Classes Within Each Provider Type Using Computers Having Internet Access (1997-98) ..... 70

7.5 - Overall Percentage of Class Emphasis on Each of Five Content Areas (1997-98) ..... 71

7.6 - Percentage of Classes Placing a “Major Emphasis” on Each of Five Content Areas Across All Provider Types (1997-98) ..... 72

7.7 - Percentage of Classes Held in Various Settings Across Provider Types (1997-98) ..... 73

**Chapter Eight**

8.1 - Percentage of State Agency Learners Served by Each Provider Type (1997-98) ..... 76

8.2 - Percentage of State Agency Learners in Each Program Across Provider Type (1997-98) ..... 77

8.3 - Percentage of State Agency Learners Within Each Age Group Served by Each Provider (1997-98) ..... 78

8.4 - Percentage of State Agency Learners Within Each Ethnic Group Served by Each Provider (1997-98) ..... 79

8.5 - Percentage of State Agency Learners Reporting Their Primary Reason for Enrollment Across Each State Agency Provider Type (1997-98) ..... 80

8.6 - Percentage of Learners Within Each Level of Progress Across Each Provider Type (1997-98) ..... 81

**Chapter Nine**

9.1 - Percentage of Special Education Learners Served by Each Provider Type (1997-98) ..... 86

9.2 - Highest Education Degree Earned Among Special Education Learner ..... 87

9.3 - Percentage of Special Education Learners Indicating Their Primary Reason for Enrollment (1997-98) ..... 88

9.4 - Percentage of Special Education Learners Within Each Level of Progress (1997-98) ..... 89

# Executive Summary

## Student Progress and Goal Attainment Report: Federally-funded ABE programs in California 1997-98

### INTRODUCTION

Section 321 of the Adult Education Act, administered by the United States Department of Education, provides funding for basic skills instruction for educationally disadvantaged adults in California. Throughout the country, federal ABE 321/326 grants to states fund a variety of adult education programs, including Adult Basic Education (ABE), English as a Second Language (ESL), High School Diploma, and General Education Development (GED) certification programs. In California, ABE 321/326 funding supplements instructional services for adults functioning below a high school level (or below a CASAS 230 scaled score). Local assistance grants are awarded to Adult Basic Education and English as a Second Language programs (including ESL-Citizenship) in school district adult schools, community college districts (CCD), community-based organizations (CBO), library literacy programs, county offices of education (COE), and jail programs, all of which must meet California Department of Education eligibility requirements. Four California state agencies, California Conservation Corps (CCC), California Department of Corrections (CDC), California Department of Developmental Services (CDDS), and California Youth Authority (CYA) are also funded by ABE 321/326.

This report presents the ABE 321/326 California learning progress and goal attainment data for state fiscal year 1997-98. This Executive Summary presents the overview and highlights from each of the chapters included in the report.

### 1997-98 CHAPTER HIGHLIGHTS

#### Chapter 1: An Overview of Adult Basic Education in California

Chapter 1 contains information about ABE 321/326 federally funded programs and CASAS. Learner populations, instruments, and data collection methods are discussed.

#### Chapter Highlights

- All agencies receiving ABE 321/326 funding were required to provide demographic and goal attainment data for learners enrolled between September 1 and October 17, 1997.
- Data were obtained from a total of 155,868 learners in ABE, ESL, and ESL-Citizenship programs. In California, ESL-Citizenship is a subset of ESL learners who attend primarily to prepare for and meet the INS citizenship requirements. For clarification in this report, data on ESL and ESL-Citizenship learners are reported separately.
- In 1997-98 California ABE 321/326 agencies served 1,435,341 adult basic education learners; thus, this report contains data on a sample of 10.9% of all learners.
- Learner data were obtained from 322 local agencies and four state agencies that provide educational programs at 70 sites.
- Basic skills test result data were obtained from 129 (40.1%) of the local agencies and each of the four state agencies.
- All agencies were to collect information from learners using the *Student Entry Record*, *Student Update Record*, and *Student Test Record*.
  - The *Student Entry Record* collects information on demographics, reason for enrollment, instructional program, and instructional level.
  - The *Student Update Record* collects information on hours of instruction, instructional level, progress, learner results, and reason for leaving early.
  - The *Student Test Record* is the answer sheet for learner responses to individual CASAS tests administered.

## **Chapter 2: Who are our Learners and In What Types of Programs Do They Enroll?**

Chapter Two provides information about program services and individuals served in California's ABE 321/326 programs that submitted data. This chapter is based on data from learners enrolled in California's ABE 321/326 programs in both local and state agencies.

### **Data Highlights**

- The majority (76.2%) of California's ABE 321/326 learners were served by school district adult schools.
- The largest percentage of learners was enrolled in ESL (73.9%), which was an increase over the 68.7% seen in 1996-97.
- 63.6% of ESL learners and 69.1% of ESL-Citizenship learners are at the beginning instructional levels; and 50.2% of ABE learners are at beginning instructional levels.
- Adult schools and community colleges tended to be very similar to one another in the percentages of ABE, ESL, and ESL-Citizenship learners they served in each of the instructional levels.
- Community-based organizations served ESL-Citizenship learners (55.6%) primarily, of which, 92.4% were at the beginning levels.
- California's ABE 321/326 programs continue to serve more females than males (58.6% and 41.4%, respectively).
- The proportion of learners 30 years of age or younger declined from 47% of ESL learners last year to 39.3 % this year. Similar declines were evidenced among ABE learners 30 years of age or younger, 49% last year and 39.4% this year.
- Hispanic learners were the highest percentage of learners served in all three programs.
- More than one-half (55.9%) of program learners had no high school diploma or degree prior to enrollment in an ABE 321/326 program. Of those learners who have a degree, most were awarded in their native country and/or the learner is functioning below a high school level (or 230 CASAS scaled score).
- The percentage of learners entering ABE 321/326 programs who have no diploma or degree has been increasing over time, from 50.9% in 1992-93 to 55.9% in 1997-98.

## **Chapter 3: Who Participates in Adult Education Through Local Agency Providers?**

Chapter Three provides information about program services and individuals served in the Local Agency Population which includes school district adult schools, community colleges, community-based organizations, library literacy programs, county offices of education, and jail programs. This chapter focuses on the demographic characteristics of learners, their instructional level, their reasons for enrollment, and any special programs in which they were participating at the beginning of this instructional window. This chapter supplements the data contained in Chapter 2 with additional program and learner information relevant to local agency data.

### **Data Highlights**

- 149,221 Student Entry Records were received from learners enrolled in ABE, ESL, and ESL-Citizenship programs in local agencies.
- The majority of local agency learners were enrolled in ESL programs (76.5%).
- The percentage of local agency learners who indicated they received TANF/GAIN or other public assistance was 5.0%.
- The most frequently cited primary reasons for enrollment for ABE learners were education (44.1%), communication (19.2%), personal goal (15.0%), and get a job (10.2%).

- The most frequently cited primary reasons for enrollment for ESL learners were communication (45.1%), education (26.4%), get a job (8.5%), and personal goal (8.1%).
- The most frequently cited primary reasons for enrollment for ESL-Citizenship learners were citizenship (62.0%), education (13.5%), communication (13.4%), and personal goal (3.7%).

#### **Chapter 4: What Changes Occurred for Learners?**

Chapter 4 provides information about local agency learners' goal attainment. Goal attainment information was collected on the Student Update Record and was to be obtained from learners after approximately 75 to 120 hours of instruction. Goal attainment includes learners' enrollment status, progress, and results, as well as their reasons for leaving early. This chapter focuses on the changes that occurred for learners during the instructional time period.

##### **Data Highlights**

- Overall enrollment status indicated that 70.5% of all learners were retained in their program at the time of the update.
- Overall retention rate increased from 68.6% in 1996-97 to 70.5% in 1997-98.
- Learners in ABE, ESL, and ESL-Citizenship programs demonstrated success with at least 28% in each program reporting completing or advancing to a higher instructional level during this time period (ABE 31.8%, ESL 28.0%, and ESL-Citizenship 41.1%).
- Improved communication (61.2%) and meeting personal goal (25.6%) were the two most frequently cited experiences realized by learners in all three instructional programs during the instructional period.
- ESL programs had the highest percentage of learners (64.6%) reporting improved communication skills.
- Learners whose primary reason for enrollment was to get a job reported a higher percentage (10.3%) of employment acquisition than those who enrolled for other reasons.
- 45.6% of learners who left their instructional program prior to completion did so for unknown reasons.
- Schedule conflicts (10.2%), employment acquisition (7.7%), and relocation (6.8%) were the most frequently cited reasons for leaving an instructional program prior to completion.
- Females were nearly 10 times as likely to leave an instructional program before completion due to child care issues.
- Nearly twice as many learners in the 61 and older age group left their program prior to completion, primarily due to health reasons or moving.

#### **Chapter 5: How Well Does the Local Testing Population Represent the Total Local Population?**

Chapter Five discusses learner characteristics of the local testing population. Each year a sample of approximately 40% of the local agencies is selected and required to administer CASAS pretests and post-tests to learners to measure learning gains. Data regarding gender, ethnic background, native language, age, years of education, and highest degree earned are presented in this chapter to establish generalizability to the larger population.

##### **Data Highlights**

- Sample data from testing agencies were included for a total of 94,914 learners enrolled in 129 local agencies. This represents 60.9% of the local agency learners and 40.1% of agencies.
- The sex and age percentages for the local testing population did not vary greater than 1% from the local agency population in any one category. The highest degree earned percentages for the local testing population did not vary greater than 2% from the local agency population in any one category.

- The ethnic categories and the years of education for the local testing population did not vary greater than 3% from the local agency population in any one category.
- The testing sample did not differ from the local population on other key variables including primary reason for enrollment, learner progress, and learner results.
- Based on the results of the comparative analyses, the local testing population was determined to be representative of the local agency population.

### **Chapter 6: What Were the Test Scores and Learner Gains for the Local Testing Population?**

Chapter Six provides information about test scores and learning gains in California's ABE 321/326 programs. The chapter is based on data from the local testing population, that is, the 129 (40.1%) local agencies that were selected and required to administer CASAS pretests and post-tests to learners to measure learning gains. Learning gains were measured after 75 to 120 hours of instruction and were computed as the difference in learners' scores on a CASAS pre- and post-test.

#### **Data Highlights**

- Reading pretest scores were compiled from an overall sample of 37,589 learners: 4,743 ABE; 30,166 ESL; and 2,680 ESL-Citizenship.
- Overall mean reading pretest scores were 222.7 for ABE learners, 210.6 for ESL learners, and 206.4 for ESL Citizenship learners.
- ESL-Citizenship learners demonstrated the lowest skill levels at program entry with 56% scoring 210 or below.
- ESL-Citizenship learners produced the highest average reading gain (6.1 points), followed by ESL learners (5.4 points) and ABE learners (4.1 points).
- Average ESL learner listening gain was 3.1 points on the CASAS scale.
- Adult schools and community college districts served higher scoring ABE learners on the reading pretest at program entry.

### **Chapter 7: What Program Characteristics Were Evidenced by Learners?**

Chapter Seven provides information about program services in California's ABE 321/326 programs. Class questionnaire data were requested from instructors in each of the local testing agencies and state agencies. Program service information includes the time of day classes met, the number of learners in each class, the number of hours the class met each week, classroom support, the emphasis of classroom instruction, primary instructional setting, and primary physical setting.

#### **Data Highlights**

- Sample data from 2,131 classes were included for analysis of program characteristics.
- An overall majority of classes (51.7%) were held in the morning followed by evening classes (36.9%) and lastly, afternoon classes (11.4%).
- ABE 321/326 classes averaged 21 learners per class.
- CCD programs had the highest class average (22), followed by adult school programs (21).
- CDC programs evidenced the highest average weekly hours of instruction (29.6), followed by CDDS (18.4) and adult schools (12.3).
- The greatest emphasis of classroom instruction for ABE 321/326 programs overall was placed on general life skills.
- The majority (56.7%) of classes were held at adult schools; 11.4% were held at community colleges; 8.7% were held at correctional facilities; and 6% were held at high schools.

## **Chapter 8: What Was the Program, Learner, and Goal Attainment Information For the State Agency Population?**

Chapter Eight provides information about program services, individuals served, and goal attainment in four state agency ABE 321/326 programs: the California Department of Corrections (CDC), the California Youth Authority (CYA), the California Department of Developmental Services (CDDS), and the California Conservation Corps (CCC).

### **Data Highlights**

- Sample data representing 6,647 learners were provided by programs in four state agencies; California Department of Corrections, California Youth Authority, California Department of Developmental Services, and the California Conservation Corps.
- The majority of learners were enrolled in ABE programs (78.4%) and ESL programs (20.9%).
- More male learners (86.4%) were represented in state agency ABE 321/326 programs overall.
- The highest proportion (34.3%) of learners were between the ages of 21 and 30, and Hispanic (49.1%).
- Education was the most frequently cited (48.4%) primary reason for enrollment among state agency learners.
- The majority of learners (63.6%) were retained at the same level of instruction after 75 to 120 hours of instruction.
- Improved communication skills was the most frequently noted (35.3%) result after 75 to 120 hours of instruction by state agency learners.
- Learners in state agency ABE programs averaged 224.6 on the CASAS reading assessment, compared to 222.7 in the local program sample.
- Reading learning gains between pre- and post-test for learners in the state agency ABE programs were, on average, 5.1 points on the CASAS scale.

## **Chapter 9: What Was the Program, Learner, and Goal Attainment Information For the Special Education Population?**

Chapter Nine provides information about program services, individuals served, and goal attainment for the California special education population. Data in this chapter are included for individuals who: a) Indicated 'special education' in the special program box on the entry form; b) Received services from the California Department of Developmental Services; or c) Took one of the CASAS assessment tests specifically designed for the special education population (Test Forms 2A, 3A, or 4A).

### **Data Highlights**

- Most special education learners were served by either adult schools (49.7%) or the California Department of Developmental Services (39.3%).
- The majority of special education learners were male (58.1%) and most were between the ages of 31 and 40 (30.1%).
- Whites were most heavily represented (67.1%) followed by Hispanics (18.4%) and Blacks (8.4%).
- Almost 84% had not received a high school diploma or GED certificate.
- The most frequently cited reason for enrollment was a personal goal (35.5%).
- Eighty-four percent of special education learners were retained at the same level of instruction from entry to update record completion.
- Reading learning gains from pre- to post-test averaged 3.13 points on the CASAS scale among special education learners.

## Chapter 10: Implications of Report Results for Future Data Collection Efforts

Each year a review of the data reveals ways in which the data collection process could be revised and improved. Based on the results of this year's data, the following changes are being made for future data collection efforts:

1. The number of learners in the fall census period will be expanded.
  - For 1998-99 the census period will be from September 1 through October 31, 1998 to increase the number of learners from which data will be collected.
2. The timeline for collecting Student Update Record information will be lengthened.
  - The timeline will be expanded from the current 75-120 hours to collecting update information by March 31, 1999. It is anticipated that an increase in the instructional period will provide a more accurate picture of the learner results that occur during a school year.
3. A Teacher Training Video will be developed and the Coordinator's Manual and Administration Manual will be expanded. A copy of each will be distributed to all agencies.
  - Accurate data is dependent upon standardized definitions and accurate data collection procedures. A Teacher Training Video for viewing by all appropriate agency staff will explain the importance of the data, the uses for the information, and highlight data collection procedures.
  - Additional training emphasis will be placed on key data collection fields, including learner results and the reason a learner may leave the program prior to completion of his/her goal.
4. The *Student Update Record* will be revised to include additional data elements for documenting learner outcomes. Additional data elements will include:
  - a greatly expanded list of learner results categorized under "Work," "Personal/Family," "Community," and "Education,"
  - expanded results include additional work-related outcomes,
  - the ability to indicate if a learner earned a certificate, and
  - the ability to document high school credits earned using a standardized format.
5. Data collection instruments will be administered to document progress in each class the learner attends during the school year. Thus, learner progress and retention can more accurately be documented.
6. Multiple *Student Entry Records* and *Student Update Records* will be available to closely track learner progress over the school year.

## Introduction: An Overview of Adult Basic Education in California

*This report presents the ABE 321/326 California learning progress and goal attainment data for state fiscal year 1997-98. Chapter 1 contains information about ABE 321/326 federal programs and CASAS. The learner population, instruments and data collection methods are discussed. A report overview is presented with chapter content highlights.*

### Data Highlights

- Data from 155,868 Student Entry Records were obtained from learners in ABE, ESL, and ESL-Citizenship programs.
- 322 local agencies and sites from 4 state agencies submitted data on their learners.

## BACKGROUND

### Federal ABE 321/326 Grants

Section 321 of the Adult Education Act, administered by the United States Department of Education, provides funding for basic skills instruction for educationally disadvantaged adults in California. Throughout the country, federal ABE 321/326 grants to states fund a variety of adult education programs, including Adult Basic Education (ABE), English as a Second Language (ESL), High School Diploma, and General Education Development (GED) certification programs.

### California ABE 321/326 Programs

In California, ABE 321/326 funding supplements instructional services for adults functioning **below** a high school level (i.e. below a CASAS 230 scaled score). Local assistance grants are awarded to Adult Basic Education and English as a Second Language programs (including ESL-Citizenship) in school district adult schools, community college districts, community-based organizations, library literacy programs, county offices of education, and jail programs, all of which must meet California Department of Education (CDE) eligibility requirements. Four California state agencies – California Conservation Corps (CCC), California Department of Corrections (CDC), California Department of Developmental Services (CDDS), and California Youth Authority (CYA) – are also funded by ABE 321/326.

ABE 321/326 funded agencies in California are instructed to administer the Student Entry Record to every student in ABE, ESL, and ESL/Citizenship programs who are enrolled and attending during a two-week period between September 1 and October 17, 1997. Research was previously conducted to determine if there were any significant differences between students who attend in the fall vs. spring on demographic, learner goal, and learner result variables. The findings indicated that the two groups of students were similar. Thus, since California ABE programs serve over 1.4 million learners per year, utilizing only a fall census data collection period was chosen to obtain generalizable data on California learners in the most cost effective manner.

### About CASAS

CASAS is a non-profit organization that provides curriculum management, assessment, and evaluation systems to adult education and training programs in the public and private sectors. CASAS was established by a consortium of California agencies to provide a curriculum-based assessment system relevant to the functional life skills needs of adults.

CASAS includes more than 100 standardized assessment instruments that measure functional reading, math, listening, speaking, and higher order thinking skills in everyday adult life and work contexts. The key components of the system are the validated *CASAS Competency List*, the *CASAS Instructional Materials Guide*, CASAS nationally validated assessment instruments, implementation guides, training, and TOPSpro (Tracking of Programs and Students) software.

The CDE has used the CASAS system for more than 15 years to provide a comprehensive, statewide database of adult learner demographic and goal attainment data, including learning gains. By using this system, education programs are able to report learner assessment results from standardized assessments and to document other learners' goal attainment and trend data. By using this standardized system, data from a variety of learners and agencies can be aggregated to produce this statewide report. In addition, individual agencies have access to reporting tools for producing agency reports for use with their students, teachers, and administrators. The system enhances accountability efforts within and among the funded adult education programs, enabling the agencies to meet program improvement goals on a long-term basis as required by the state plan.

## LEARNER POPULATION AND DATA COLLECTION METHODS

### Total Enrollment Population

California agencies receiving ABE 321/326 funds included 322 local agencies and 4 state agencies. From these agencies, a total of 155,868 Student Entry Records were collected from learners enrolled in Adult Basic Education (ABE), English as a Second Language (ESL), ESL-Citizenship programs, and eligible special education programs.

### Sub-populations

The California ABE 321/326 total enrollment population consists of three distinct sub-populations. Due to the unique differences and data collection timelines among participating agencies, the total enrollment population was divided into three sub-populations, and each will be discussed separately in this report. The three sub-populations are:

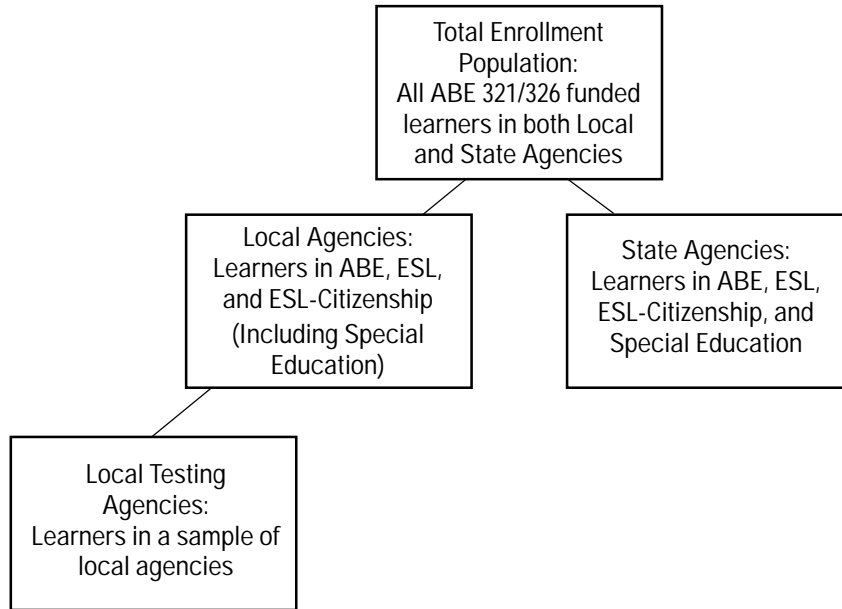

- **Local agencies:** Adult schools, community colleges, community-based organizations, library literacy programs, county offices of education, and jail programs.

Within this local agency sub-population an additional subgroup is discussed separately in this report.

- **Local testing agencies:** A sample of local agencies was selected to administer CASAS tests to learners. This subgroup of local agencies that participated in ABE 321/326 testing will be referred to as local testing agencies. Procedures for determining the sample are discussed in Appendix A.
- **Local special education learners:** Report data on the special education population who attend programs at local agencies will be discussed separately from special education learners enrolled in state hospital programs.
- **State agencies:** Four state agencies operate ABE 321/326 programs - California Department of Corrections, California Youth Authority, California Conservation Corps, and the California Department of Social Services.

Figure 1.1 contains a graphic representation of the above-described populations to be discussed within this report.

**Figure 1.1 – The California ABE 321/326 Population**

CASAS 1998

### Local Agencies

A total of 149,221 Student Entry Records were collected from learners in local agencies. Table 1.1 shows the number of participating local agencies and the number of Student Entry Records collected from each agency type. See Figures 3.2 & 3.3 for the percentage of students.

**Table 1.1—Local Agencies**

Local Agency Type	Number of Agencies	Number of Student Entry Records			
		ABE	ESL	ESL-CIT	TOTAL
Adult Schools	197	12,833	95,234	10,748	118,815
Community-based Organizations	59	1,313	2,292	4,513	8,118
Community Colleges	21	1,841	16,325	872	19,038
Library Literacy Programs	35	1,333	162	20	1,515
County Offices of Education	5	66	133	56	255
Jail Programs	5	1,406	72	2	1,480
<b>Total</b>	<b>322</b>	<b>18,792</b>	<b>114,218</b>	<b>16,211</b>	<b>149,221</b>

CASAS 1998

### Local Testing Agencies

A total of 94,914 Student Entry Records were collected from learners in local testing agencies. Table 1.2 shows the number of participating local agencies and the number of Student Entry Records collected from each agency type.

**Table 1.2—Local Testing Agencies**

Local Testing Agency Type	Number of Agencies	Number of Student Entry Records			TOTAL
		ABE	ESL	ESL-CIT	
Adult Schools	82	8,250	64,042	5,464	77,756
Community-based Organizations	19	328	119	1,029	1,476
Community Colleges	10	1,549	11,651	472	13,672
Library Literacy Programs	13	461	76	3	540

Jail Programs	2	1,351	29	0	1,380
<b>Total</b>	<b>129</b>	<b>11,965</b>	<b>75,981</b>	<b>6,968</b>	<b>94,914</b>

CASAS 1998

### Local Special Education Learners

A total of 2,846 Student Entry Records were collected from special education learners in local agencies. Table 1.3 shows the number of Student Entry Records collected from special education learners instructed within a local agency. *Data on special education learners attending programs under the Department of Social Services are contained in the State Agency section.*

**Table 1.3—Local Special Education Learners**

Local Testing Agency Type	Number of Agencies	Number of Student Entry Records			TOTAL
		ABE	ESL	ESL-CIT	
Adult Schools	73	2,173	141	21	2,335
Community-based Organizations	9	267	2	4	273
Community Colleges	12	162	58	2	222
Library Literacy Programs	5	12	2	0	14

Jail Programs	1	2	0	0	2
<b>Total</b>	<b>100</b>	<b>2,616</b>	<b>203</b>	<b>27</b>	<b>2,846</b>

CASAS 1998

## State Agencies

A total of 6,647 Student Entry Records were collected from learners in the four state agencies. Table 1.4 shows the number of Student Entry Records collected from each agency.

Table 1.4—State Agencies

State Agency	Number of Student Entry Records			TOTAL
	ABE	ESL	ESL-CIT	
California Conservation Corps	288	2	0	290
California Department of Corrections	2,988	826	1	3,815
California Department of Social Services	2,177	0	0	2,177
California Youth Authority	169	164	32	365
<b>Total</b>	<b>5,622</b>	<b>992</b>	<b>33</b>	<b>6,647</b>

CASAS 1998

## Data Collection Forms

All agencies were to collect information from learners using the *Student Entry Record*, *Student Update Record*, and *Student Test Record*. The *Student Entry Record* collects information on demographics, reason for enrollment, instructional program, and instructional level. The *Student Update Record* collects information on hours of instruction, instructional level, progress, learner results, and reason for leaving early. The *Student Test Record* is the answer sheet for learner responses to individual CASAS tests administered (see Appendix B). These instruments were distributed by CASAS to all ABE 321/326 agencies during August, 1997. Each of the instruments utilizes a scannable format. Agencies that chose to scan and utilize their own agency data were provided with a copy of TOPSpro 1.4 software. TOPSpro software reads the data and provides agencies a variety of usable report options to summarize learner information for learners, instructors, and administrators. Agencies using TOPSpro were requested to export their data to CASAS for inclusion in statewide data aggregation. Agencies not using TOPSpro were requested to mail the scannable forms to CASAS where the forms were scanned. All data were aggregated from both TOPSpro disks and forms mailed to CASAS.

Each Local Testing Agency was also required to have instructors complete one *Instructional Questionnaire* for each class in which a CASAS test was administered. The Instructional Questionnaire gathers data regarding the instructional setting and available resources (see Appendix B).

## METHODOLOGY

### Local Agencies

California adult basic education agencies receiving ABE 321/326 funds were instructed to collect Student Entry Record information on all learners enrolled and attending from *September 1 to October 17, 1997*. Agencies were requested to obtain data on goal attainment information, on learner progress, learner results, and reasons for leaving early by utilizing the Student Update Record on the same group of learners who completed a Student Entry Record. *Data were to be collected after 80-100 hours of instruction for students attending 6-15 hours per week or after 100-200 hours of instruction was completed by students attending 20 or more hours per week. The deadline for submitting all data was March 1, 1998.*

### Local Testing Agencies

Within the local agency subpopulation, a sample of agencies was selected and required to administer a CASAS pretest and post-test to measure learning gains. Sampling procedures for determining the testing agencies are contained in Appendix A. Testing agencies were also required to submit class information to determine characteristics about the instructional settings.

## Special Education Learners

California adult basic education agencies receiving ABE 321/326 funds were instructed to collect Student Entry Record information on all individuals enrolled and attending from *September 1 to October 17, 1997*. Due to the nature of this population, *pretests and post-tests are collected on an annual basis* rather than after 80-100 hours suggested for learners in other local agency programs.

## State Agencies

The four California state agencies receiving ABE 321/326 funds were instructed to collect Student Entry Record information on all learners enrolled and attending throughout the school year. All agencies were also required to administer a CASAS pretest and post-test to all learners to measure learning gains.

## REPORT OVERVIEW

### Changes from Previous Reports

This year's report has one significant terminology change and is structured slightly differently from reports of prior years.

- **Terminology**  
The terminology change is from "sampling" agency to "testing" agency. In order to minimize confusion in this year's report, the data from local agencies that were selected using a sampling process and are required to administer CASAS tests, as well as those agencies that voluntarily elected to test students, are combined and collectively called testing agencies.
- **Structure**  
Two structure changes occurred in this year's report. The first is due to differences in how data were collected. 1997-98 was the first year that goal attainment information was required of all agencies. Thus, the chapter on reasons for enrollment and goal attainment contains data on local agencies, rather than on the local testing population as seen in previous reports. The second structure change is a separation of special education learners. This year special education learners attending local agency programs will be covered in separate section. In previous reports the discussion of special education learners enrolled in ABE 321/326 programs in both local and state agencies was combined. This year, special education learners in state agencies are discussed in the state agency section.

### Chapter Contents

**Chapter 2** reports program and learner data from the total enrollment population.

**Chapters 3-7** report data from local agencies only:

- Chapter 3 reports program and learner information from the local agency population.
- Chapter 4 reports reasons for enrollment and goal attainment from the local agency population.
- Chapter 5 presents key demographic information on both the local agency and the local testing populations and discusses the representativeness of the testing population.
- Chapter 6 presents testing results for the local testing agencies.
- Chapter 7 presents program services information as completed by testing agencies.

**Chapter 8** presents data related to all four state agencies.

**Chapter 9** presents information on the adult special education population who attends a program within a local agency.

**Chapter 10** presents implications for report results for future data collection efforts.

**Appendices** contain tables with additional detailed information.

Table 1.5 may be used as a guide to understanding the data presented in each chapter of this report. This table outlines which portion of all ABE 321/326 data collected from California programs is reported in each chapter.

**Table 1.5 — Population for Each Report Chapter**

Chapter	Data Reported (N=)	Data Set: Data Description	Local Agencies			State Agencies			
			ABE	ESL	ESL-CIT	CCC	CDC	CDDS	CYA
2	155,868	<b>Total Enrollment Population:</b> All data collected from all local and state agencies	X	X	X	X	X	X	X

9	2,846	<b>Local Agency Population:</b> Data selected for Special Education learners in local agencies.	X	X	X				

CASAS 1998

## Program and Learner Information for the Total Enrollment Population: Who are our Learners and in What Types of Programs do They Enroll?

*Chapter Two provides information about program services and individuals served in California's ABE 321/326 programs that submitted data. This chapter is based on data from learners enrolled in California's ABE 321/326 programs – local and state — during the census period of September 1 to October 17, 1997. Data were collected from learners in California school district adult schools, community college districts, community-based organizations, library literacy programs, county jail programs, and county offices of education, as well as from learners in the state agencies: California Conservation Corps, California Department of Developmental Services, California Department of Corrections, and the California Youth Authority. Additional data on learners in the total enrollment population can be found in Appendix C.*

### **Data Highlights**

- The majority (76.2%) of California's ABE 321/326 learners were served by school district adult schools.
- The largest percentage of learners was enrolled in ESL (73.9%), which was an increase over 1996-97.
- 63.6% of all ESL learners and 69.2% of ESL-Citizenship learners are at the beginning instructional levels; and 50.2% of ABE learners are at beginning instructional levels.
- Adult schools and community colleges tended to be very similar to one another in the percentages of ABE, ESL, and ESL-Citizenship learners they served in each of the instructional levels.
- Community-based organizations served ESL-Citizenship learners (55.6%) primarily, of which, 92.4% were at the beginning levels.
- California's ABE 321/326 programs continue to serve more females than males (58.6% and 41.4%, respectively).
- The majority of learners in ABE and ESL programs were between the ages of 21 and 40. ESL-Citizenship were slightly older with the majority between 31 and 50.
- Hispanic learners were the highest percentage of learners served in all three programs.
- More than one-half (55.9%) of program learners had no high school diploma or degree prior to enrollment in an ABE 321/326 program. Of those learners who have a degree, most were awarded in their native country and/or the learner is functioning below a high school level (or 230 CASAS scale score).
- The percentage of learners entering ABE 321/326 programs who have no diploma or degree has been increasing over time, from 50.5% in 1993-98 to 55.9% in 1997-98.

## PROGRAM INFORMATION

Program information includes provider type, instructional program, instructional level, and special program status. A *provider type* designation is assigned to each agency. The *instructional program*, *instructional level*, and *special program* status was provided by instructors and learners on the Student Entry Record form completed by each learner.

### Provider Type

Ten types of agencies provided instruction to California's ABE 321/326 learners in 1997-98. Six of these provider types were local agencies: school district adult schools ( $N = 197$ ), community college districts ( $N = 21$ ), community-based organizations ( $N = 59$ ), library literacy programs ( $N = 35$ ), county jail programs ( $N = 5$ ), and county offices of education ( $N = 5$ ). There were 197 adult schools, 21 community colleges, 59 community-based organizations, 5 county offices of education, 35 library literacy programs, and 5 county jail programs that submitted data on learners for 1997-98.

The other four provider types were state agencies: California Conservation Corps serving at-risk youth in 12 locations, Department of Developmental Services (CDDS), serving institutional adults in 7 state hospitals, California Department of Corrections (CDC) serving incarcerated adults in 23 prisons, and California Youth Authority, serving youths between the ages of 17 and 25 who have been sentenced by the courts, in 4 locations.

The majority (76.2%) of California's ABE 321/326 learners were served by school district adult schools in 1997-98. Other major providers were community college districts (CCD = 12.2%), community-based organizations (CBO = 5.2%), and the California Department of Corrections (CDC = 2.4%). While the percentage of learners served by each provider type has fluctuated over the years, these four providers have consistently served the largest percentage of learners (see Table 2.1)

**Table 2.1 – Percentage of Learners Served by Each Provider Type From 1993 to 1998**

	1993-94		1994-95		1995-96		1996-97		1997-98

CASAS 1998 - No data submitted.

### Instructional Program

Student Entry Records were obtained from 155,868 learners enrolled in California's ABE 321/326 programs. The largest percentage of learners, 73.9 percent, was served in English as a Second Language (ESL) programs, with 15.7 percent in Adult Basic Education (ABE), and 10.4 percent in ESL-Citizenship programs (See Figure 2.1). Using the above percentages and extrapolating to the total of 1,435,341 learners in California, Figure 2.1 indicates that 225,349 are in ABE programs, 1,060,717 are in ESL programs, and 149,275 are in ESL-Citizenship programs. ESL programs in California contain a subset of learners whose focus of instruction is ESL with a citizenship emphasis. For the purposes of this report, ESL and ESL-Citizenship are reported separately.

**Figure 2.1 – Total Enrollment Population  
Distribution of Learners by Instructional Program (1997-98)**

CASAS 1998

A review of trend data for ABE, ESL, and ESL-Citizenship since 1995-96 indicates that the total number of learners who responded increased 17.3% over 1996-97. The majority of the increase seen in 1997-98 was among ESL students; the number of ABE and ESL-Citizenship respondents remained fairly constant. Thus, the resulting percentages of ABE and ESL-Citizenship learners decreased and the percentage of ESL learners increased in 1997-98 (see Table 2.2).

**Table 2.2 – Total Enrollment Population  
Instructional Program (1993-94 to 1997-98)**

**Patterns of Provider Services Within Instructional Program**

Further analyzing the characteristics of each of the instructional programs, it can be seen in Figure 2.2 that the pattern of provider services varied by instructional program. Within ABE programs, the top four providers were school district adult schools (52.6%), the CDC (12.2%), the California Department of Development Services (8.9%), and community college districts (7.5%). For ESL, only two providers dominated: school district adult schools (82.7%) and community college districts (14.2%). For ESL-Citizenship programs, the key providers were school district adult schools (66.2%), community-based organizations (27.8%), and community college districts (5.4%).

**Figure 2.2 – Percentage of Learners in Each Instructional Program  
Serviced by Each Provider Type  
(N = 155,868)**

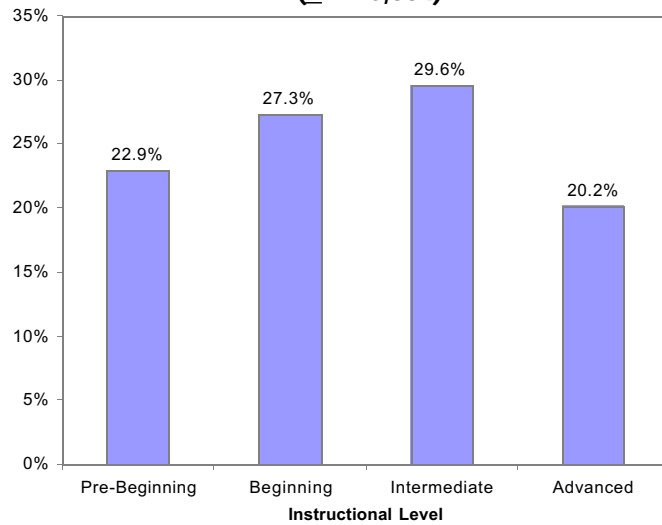

Additional program information for learners in the total enrollment population can be found in Appendix C.

### Instructional Level

A total of 145,899 learners indicated their instructional level. Figures 2.3 and 2.4 present instructional program and level data for the ABE, ESL, and ESL-Citizenship learners across all provider types. ABE and ESL program levels follow the Model Standards published for each of those programs. ABE instruction is divided into four levels: Pre-beginning, Beginning, Intermediate, and Advanced. ESL instruction is divided into six levels: Beginning Literacy, Beginning Low, Beginning High, Intermediate Low, Intermediate High and Advanced.

**ABE:** The data show that 22.9% of the ABE participants are at the Pre-Beginning level, 27.3% at the Beginning level, and 29.6% at the Intermediate level. Among the ABE population, 20.2% were at the advanced level which is much higher than was seen in either the ESL or ESL-Citizenship populations (see Figure 2.3).

**Figure 2.3 – Percentage of ABE Learners at Each Instructional Level  
When Entering Program (1997-98)  
(N = 20,884)**

CASAS 1998

**ESL:** The data indicate that 51.5% of ESL learners were at the Beginning Low or Beginning High levels. Combined with the Beginning Literacy level (12.1%), a total 63.6% of all ESL learners are at the beginning levels (see Figure 2.4).

**ESL-Citizenship:** As seen in Figure 2.4, these data indicate that 69.1% of all ESL-Citizenship learners were at the beginning levels. ESL-Citizenship learners were primarily at the Beginning Literacy (26.7%) and Beginning Low (26.6%) levels. The Beginning High level was represented by 15.9% of learners. *It is at the Beginning High level that most participants begin to profit from citizenship instruction and take a standardized citizenship written test. Among this sample, 53.2% of the ESL-Citizenship learners were below this level.* However, lower-skilled individuals could benefit from an ESL-Citizenship program if they remained in the program long enough to acquire the necessary English language skills to pass a standardized citizenship test and the INS interview.

**Figure 2.4**

**Each Instructional Level When Entering Program (1997-98)**  
**(ESL: N = 110,707; ESL-Cit: N = 14,308)**

CASAS 1998

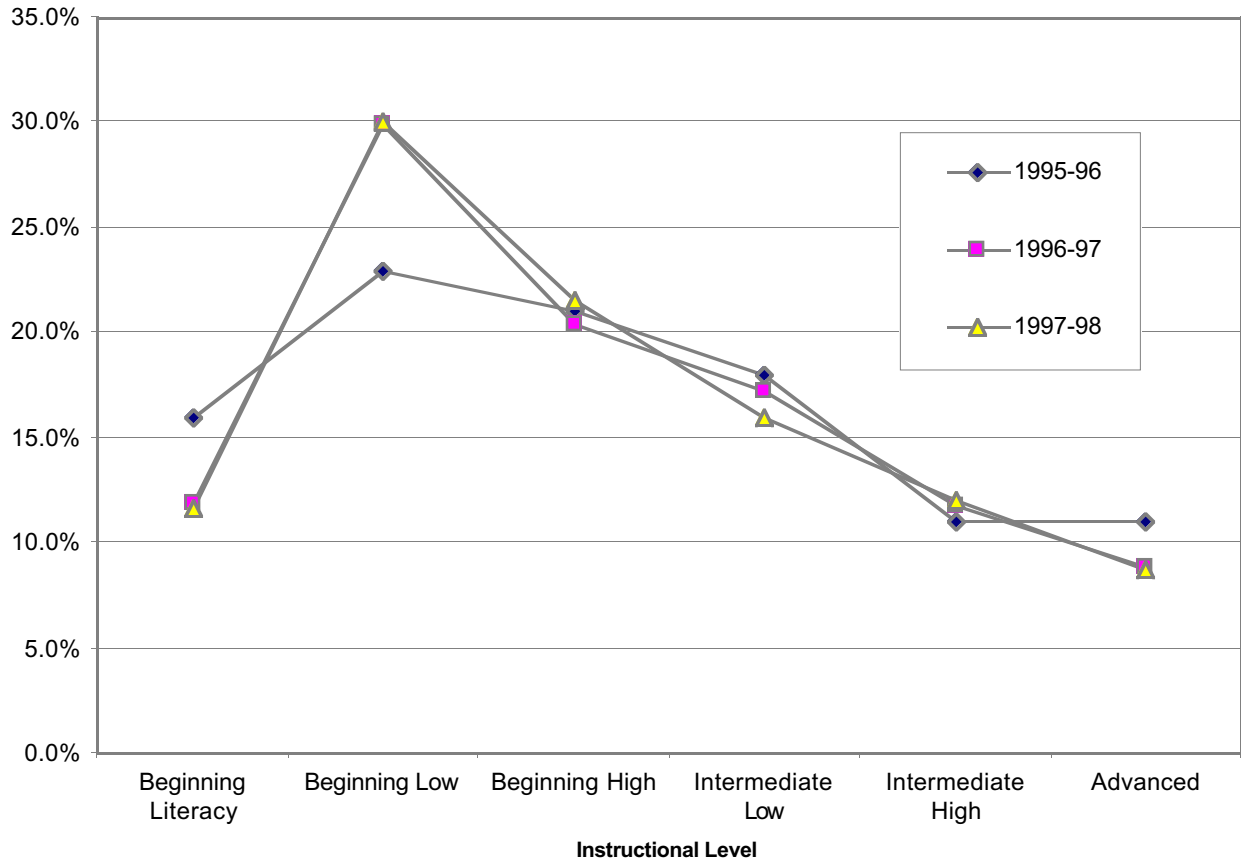

A review of trend data on instructional levels per instructional program reveals the interesting fact that the number of ESL-Citizenship learners at the Beginning Literacy or Beginning Low instructional level upon entry has been increasing (see Figure 2.5). During 1995-96, 37% of learners were in these two levels; in 1996-97 the percentage was 40.7% of learners; and, in 1997-98, 53.1% of learners were in these two levels. Figures 2.6 and 2.7 contain trend data for ESL and ABE learners for 1995-96 to 1997-98. As can be seen, no dramatic changes in the percentage of learners within any of the instructional levels was seen in the ESL or ABE learner populations.

### Instructional Levels Served Within Instructional Programs

Some variation existed by provider type in the percentages of learners served at various instructional levels within instructional programs.

**ABE:** The CDDS served much higher percentages of learners in the lower ABE instructional levels than did other providers, and this could be expected for a provider focused on special education programs. Among CDDS' ABE learners, 92.8% are at Pre-Beginning or Beginning levels. Community-based organizations also served higher percentages of learners in the lower ABE instructional levels than did other providers with 80.6% of their learners at Pre-Beginning or Beginning levels. Among adult school and community college learners, 46.2% and 42.8% respectively, were at Pre-Beginning or Beginning levels. In contrast, only 19.6% of learners in jail programs were at the Beginning levels, while 64.6% were at the Advanced level (see Table 2.3).

ESL: Adult schools and community colleges tended to be very similar to one another in the percentages of ESL learners they served in each of the ESL instructional levels (63.8% and 57.9% of learners in the Beginning ESL instructional levels, respectively). Community-based organizations served a much higher percentage of learners in the Beginning ESL instructional levels than did other providers (88.8%).

**Table 2.3 – Percentage of Learners at Each Instructional Level  
Within Each Provider Type (1997-98)**

CASAS 1998 - No data submitted.

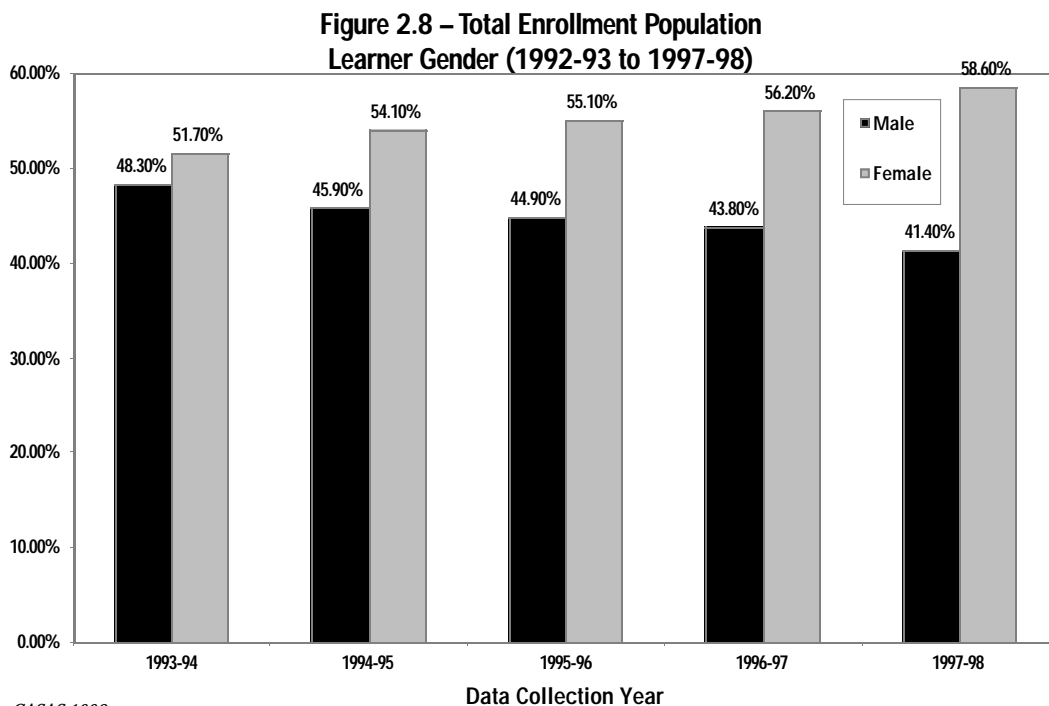

**ESL-Citizenship:** The same trends seen with ESL learners were seen with ESL-Citizenship learners. Adult schools and community colleges tended to be very similar to one another in the percentages of ESL-Citizenship learners they served in the Beginning instructional levels (60.2% and 64.9%, respectively). Community-based organizations served a much higher percentage of ESL-Citizenship learners in the Beginning instructional levels than did other providers (92.4%). See Table 2.3 for all other comparisons.

## LEARNER INFORMATION

Student information was provided by both instructors and learners on the Student Entry Record form. Information detailed in this summary includes gender, age, ethnic background, years of education, and highest degree earned. The learners' reasons for enrollment are discussed separately for the local agency population (see Chapter 4) and the state population (see Chapter 9).

### Gender

In 1997-98, as in prior years, California's ABE 321/326 programs served more female than male learners (58.6% and 41.4%, respectively). A continual increase in the percentage of female learners has been seen over the past six years (see Figure 2.8). The gender distribution of the population varied by provider type. Adult schools, community colleges, community-based organizations, library literacy, and county office of Education programs enrolled a greater percentage of females than males. In contrast, males were the overwhelming majority in the remaining provider types, which included all the state agencies and jail programs (see Table C1 in Appendix C).

CASAS 1998

## Age

More than one-half (56.9%) of ABE 321/326 learners were between 21 and 40 years old. ABE programs served a higher proportion of learners under 21 than did ESL and ESL-Citizenship programs, while ESL-Citizenship programs served a higher proportion of older learners. More than one-half (53.0%) of ESL-Citizenship learners are over 40 (see Figure 2.9). The proportion of younger learners has steadily declined during the last five years, while the proportion of older learners has steadily increased (see Table C2 in Appendix C).

**Figure 2.9 – Percentage of Learners Within Each Instructional Program Categorized by Age (1997-98)**  
(N = 142,408)

CASAS 1998

The only notable difference among the provider types in the percentage of learners served within each age group was, as one would expect, the majority of CYA and CCC learners are between ages 15-20 (62.0% and 63.9%, respectively) (see Table C3 in Appendix C).

### Ethnic Background

The majority of ABE 321/326 learners are Hispanic (64.7%), followed by Asian (20.2%), white (9.7%), and black (2.8%). The percentage of Hispanic learners has been increasing over time, while the percentage of Asian learners has been decreasing (see Table C4, Appendix C Learner Ethnicity 1993-94 to 1997-98).

Hispanic learners were the highest percentage of learners served in all three programs: ABE (44.8%), ESL (67.9%), and ESL-Citizenship (71.8%). Both white and black learners were also heavily represented in ABE programs (27.4% and 15.3%, respectively), while Asian learners were more heavily represented in ESL and ESL-Citizenship (23.0% and 19.6%, respectively). See Figure 2.10 for all other comparisons.

**Figure 2.10 – Percentage of Learners Within Each Instructional Program Categorized by Ethnicity (1997-98)**  
(N = 153,046)

CASAS 1998

The ethnic background of learners also varied according to provider type. The highest percentage of learners attending adult schools (67.1%) and community colleges (55.9%) were Hispanic, while Asians accounted for the second largest groups (21.5% and 25.1%, respectively) (see Table 2.4).

**Table 2.4 – Percentage of Learners Within Each Provider Type Representing Each Ethnic Group (1997-98)**

CASAS 1998

- No data submitted.

Table C5 in Appendix C contains information presented on learners' native language by instructional program and provider type. Learner's native language was defined as the predominant language spoken in the household as a child.

### Highest Degree Earned

California's ABE 321/326 programs served individuals with little prior education. More than one-half (55.9%) of program learners had no high school diploma or degree prior to enrollment in an ABE 321/326 program. Of those learners who have a degree, most were awarded in their native county and/or the learner is functioning below a high school level (or 230 CASAS scale score). All three instructional programs enroll the majority of their learners with no formal degree (ABE, 67.7%; ESL, 51.3%; and ESL-Cit., 70.7%) (see Table C6, Appendix C). The educational level of learners entering ABE 321/326 programs has been declining over time. The proportion of learners enrolling who have no diploma or degree was 55.9% in 1997-98 compared to 50.5% in 1993-94 (see Table C7 in Appendix C).

In an analysis of the data by provider type, the percentages of learners who had not earned a formal diploma or degree range from 87.3% to 41.3%. The percentages, in decreasing order by provider type, of those who had not earned a formal diploma or degree are: CBO (87.3%), CDC (81.5%), CDDS (79.8%), COE (76.6%), CYA (73.1%), Lib (57.7%), Adult (54.7%), Jails (53.1%), CCC (49.5%), and CCD (41.3%). See Table 2.5 for all other comparisons.

## Program and Learner Information for the Local Agency Population: Who Participates in Adult Education Through Local Agency Providers?

*Chapter Three provides information about program services and individuals served in the Local Agency Population: school district adult schools, community colleges, community-based organizations, library literacy programs, county offices of education, and jail programs. This chapter supplements the data contained in Chapter 2 with additional program and learner information relevant to local agency data. This is a new chapter from previous ABE 321/326 reports.*

### **Data Highlights**

- 149,221 Student Entry Forms were received from learners enrolled in ABE (12.6%), ESL (76.5%), and ESL-Citizenship (10.9%) programs in local agencies.
- The majority of local agency learners were enrolled in ESL programs (76.5%).
- The percentage of local agency learners who indicated they received TANF/GAIN or other public assistance was 5.0%.
- The most frequently cited primary reasons for enrollment for ABE learners were education (44.1%), communication (19.2%), personal goal (15.0%), and get a job (10.2%).
- The most frequently cited primary reasons for enrollment for ESL learners were communication (45.1%), education (26.4%), get a job (8.5%), and personal goal (8.1%).
- The most frequently cited primary reasons for enrollment ESL-Citizenship learners were citizenship (62.0%), education (13.5%), communication (13.4%), and personal goal (3.7%).

### **PROGRAM INFORMATION**

#### **Instructional Program**

Of the total enrollment population of 155,868 who indicated their program area, 149,221 were enrolled in local agency programs. Figure 3.1 illustrates the distribution of learners by program area.

**Figure 3.1 – Local Agency Population  
Distribution of Learners by Instructional Program (1997-98)**

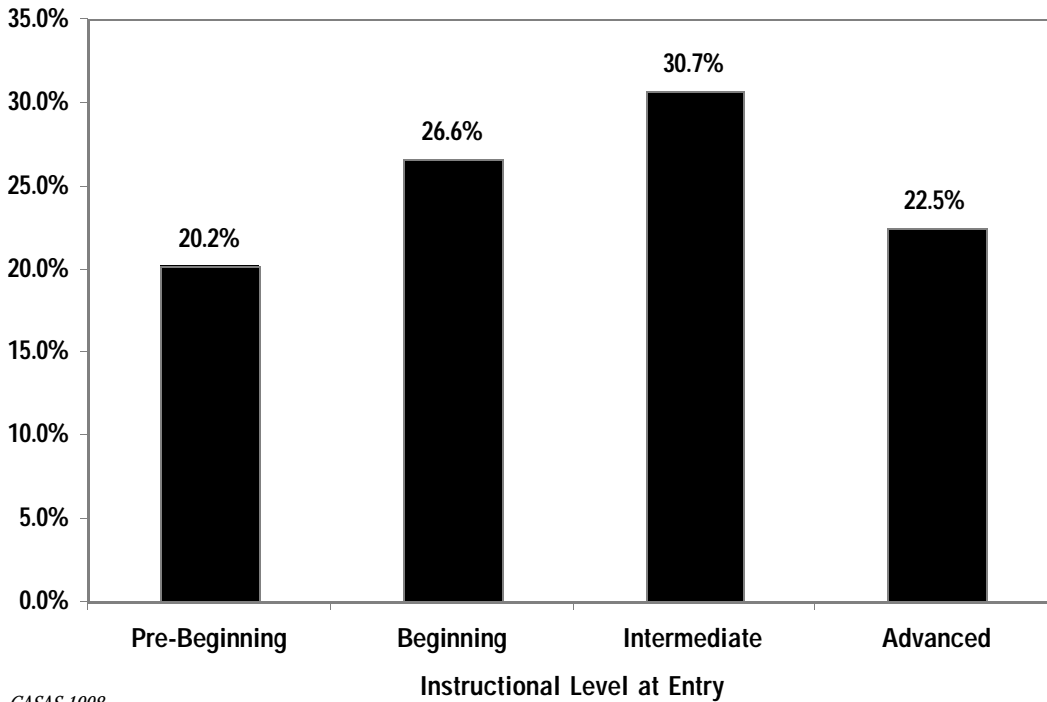

CASAS 1998

**Instructional Levels**

A total of 139,650 learners indicated their instructional level; 9,571 people did not indicate their instructional level. Figures 3.2 and 3.3 present instructional program and level data for the ABE, ESL, and ESL-Citizenship learners who are classified as local agency learners.

**Figure 3.2 – Percentage of ABE Learners at Each Instructional  
Level When Entering Program (1997-98)  
(N = 15,590)**

CASAS 1998

**Figure 3.3 – Percentage of ESL and ESL-Citizenship Learners at Each Instructional Level when Entering Program (1997-98)**  
 (ESL:  $N = 109,784$ ; ESL-Cit:  $N = 14,276$ )

### LEARNER INFORMATION - SPECIAL PROGRAMS AND REASONS FOR ENROLLMENT

Demographic data by provider type was discussed in Chapter 2. The following section focuses on the Special Programs and Reasons for Enrollment indicated by local agency learners.

#### Special Programs

Learners were instructed to mark all Special Programs which were applicable, so multiple marks were allowed. The tabled percentages represent the number of learners in the local agency population who marked each particular special program. Table 3.1 summarizes the distribution of learners indicating each special program.

**Table 3.1 – Percentage of Learners in the Local Population Enrolled  
In Special Programs (1997-98)  
(N = 149,221)**

Special Program	Frequency	Percent
TANF/GAIN	4,877	3.3
Other Welfare	2,558	1.7
JTPA	695	.5
Correctional Ed.	1,292	.9
Jail	1,909	1.3
Special Ed.	2,711	1.8
Homeless	235	.2
Family Lit.	1,589	1.1
Workplace Ed.	962	.6
Distance Learning	1,228	.8
5% Projects	835	.6

*CASAS 1998*

The total number of learners on public assistance may be estimated by adding the TANF/GAIN count with the Other Welfare count. The total number of learners indicating one or both is 7,435 which represents 5.0% of the population. The number of individuals who marked both categories is 206 representing .1% of the total population.

### Reasons for Enrollment

A portion of the Student Entry Record solicited information regarding the primary and secondary reasons learners had for enrolling in one of the three instructional programs. The data show that learner reasons for enrollment varied by instructional program, as one would expect.

**ABE:** For learners in ABE programs, the most frequently cited primary reasons for enrollment were education (44.1%), communication (19.2%), personal goal (15.0%), and get a job (10.2%). The most frequently cited secondary reasons for enrollment were personal goal (28.0%), education (19.9%), get a job (18.6%), and communication (12.6%). See Table 3.2 for all other percentages.

**Table 3.2 – Percentage of ABE Learners Indicating Primary and  
Secondary Reasons for Enrollment (1997-98)  
(Primary Reason - N = 18,377; Secondary Reason - N = 17,448)**

	Primary Reason	Secondary Reason
<b>Education</b>	44.1%	19.9%
<b>Get a Job</b>	10.2%	18.6%
<b>Improve Job</b>	5.9%	8.4%
<b>Communication</b>	19.2%	12.6%
<b>Citizenship</b>	1.8%	2.3%
<b>Personal Goal</b>	15.0%	28.0%
<b>Mandated</b>	3.7%	0.9%

*CASAS 1998*

**ESL:** For learners in ESL programs, the most frequently cited primary reasons for enrollment were communication (45.1%), education (26.4%), get a job (8.5%), and personal goal (8.1%). Their most frequently cited secondary reasons for enrollment were communication (25.5%), education (17.9%), get a job (16.3%), and personal goal (14.9%). See Table 3.3 for all other percentages.

**Table 3.3 – Percentage of ESL Learners Indicating Primary and Secondary Reasons for Enrollment (1997-98)**  
(Primary Reason - N = 111,511; Secondary Reason – N = 106,222)

	Primary Reason	Secondary Reason
<b>Education</b>	26.4%	17.9%
<b>Get a Job</b>	8.5%	16.3%
<b>Improve Job</b>	6.1%	9.8%
<b>Communication</b>	45.1%	25.5%
<b>Citizenship</b>	4.2%	7.4%
<b>Personal Goal</b>	8.1%	14.9%
<b>Mandated</b>	1.6%	0.4%

*CASAS 1998*

**ESL-Citizenship:** For learners in ESL-Citizenship programs, the most frequently cited primary reasons for enrollment were citizenship (62.0%), education (13.5%), communication (13.4%), and personal goal (3.7%). Their most frequently cited secondary reasons for enrollment were communication (23.8%), education (23.9%), citizenship (18.3%), and personal goal (15.8%). See Table 3.4 for all other percentages.

**Table 3.4 – Percentage of ESL-Citizenship Learners Indicating Primary and Secondary Reasons for Enrollment (1997-98)**  
(Primary Reason - N = 15,854; Secondary Reason – N = 13,806)

	Primary Reason	Secondary Reason
<b>Education</b>	13.5%	23.9%
<b>Get a Job</b>	2.6%	7.5%
<b>Improve Job</b>	1.8%	4.2%
<b>Communication</b>	13.4%	23.8%
<b>Citizenship</b>	62.0%	18.3%
<b>Personal Goal</b>	3.7%	15.8%
<b>Mandated</b>	2.9%	0.8%

*CASAS 1998*

Appendix F contains geographic region data for local agencies.

## Goal Attainment Information for Local Agency Learners: What Changes Occurred for Learners?

*Chapter 4 provides information about local agency learners' goal attainment. Goal attainment information was collected on the Student Update Record and was to be obtained from learners after approximately 75 to 120 hours of instruction. Goal attainment includes learners' enrollment status, progress, and results, as well as their reasons for leaving early. This chapter focuses on the changes that occurred for learners during the instructional time period.*

### **Data Highlights**

- Overall enrollment status indicated that 70.5% of all learners remained in their program at update.
- Overall retention rate increased from 68.6% in 1996-97 to 70.5% in 1997-98.
- Learners in ABE, ESL, and ESL-Citizenship programs demonstrated success with at least 28% in each program reporting completing or advancing to a higher instructional level.
- Improved communication (61.2%) and meeting personal goal (25.6%) were the two most frequently cited experiences realized by learners in all three instructional programs during the instructional period.
- ESL programs had the highest percentage of learners (64.6%) reporting improved communication skills.
- Learners whose primary reason for enrollment was to get a job reported a higher percentage (10.3%) of employment acquisition than those who enrolled for other reasons.
- 45.6% of learners who left their instructional program prior to completion did so for unknown reasons.
- Schedule conflicts (10.2%), employment acquisition (7.7%), and relocation (6.8%) were the most frequently cited reasons for leaving an instructional program prior to completion.
- Females were nearly 10 times as likely to leave an instructional program before completion due to child care issues.
- Nearly twice as many learners in the 61 and older age group left their program prior to completion primarily due to health and moving.

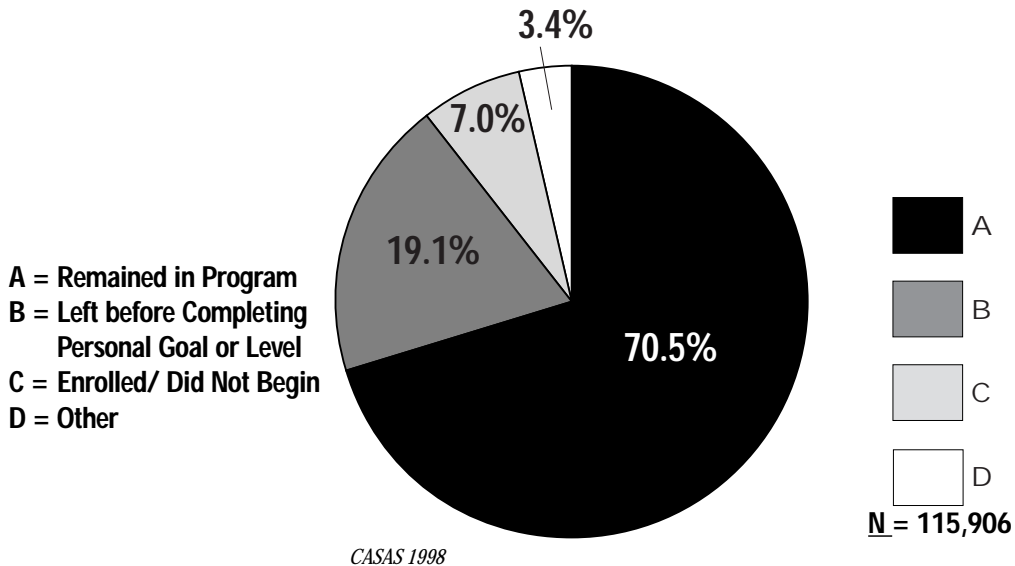

## GOAL ATTAINMENT INFORMATION

### Learner Enrollment Status

Learner enrollment status was supplied by instructors and captured one of three possible options:

1. *Remained in program*: Learners who were still enrolled at the time of completing the Student Entry Record. This option, remained in program, contained learners who indicated one of the following four responses:
    - Retained in program* at same level: Learners who were enrolled in the program at the same level as they had been at the time of completing their Student Entry Record.
    - Changed program*: Learners who were still enrolled in the agency but had changed their instructional program since completing their Student Entry Record.
    - Completed level/course*: Learners who had completed the instructional level or course since completing their Student Entry Record but had not begun a higher level.
    - Moved to a higher level*: Learners who had completed an instructional level and had moved to a higher level since completing their Student Entry Record.
  2. *Left before completing personal goal or level entered*: Learners who were no longer in the program but had not completed their personal goal or their instructional level before leaving.
  3. *Enrolled/did not begin instruction*: Learners who did not attend after completing their Student Entry Record.
- At the time of completing the Student Update Record, 70.5% of learners remained enrolled in ABE 321/326 programs, while 19.1% had left before completing a personal goal or the level they entered, and 7.0% had enrolled but did not begin instruction (See Figure 4.1).

Figure 4.1 – Local Agency Population  
Distribution of Learners by Learner Enrollment Status (1997-98)

It is interesting to note that a nearly equal proportion of learners remaining in their program at time of update is represented across all three program types: 70.1% of ABE learners, 70.5% of ESL learners and 71.1% of ESL-Citizenship learners (See Figure 4.2). These findings illustrate an overall improvement in participant retention from the 1996-97 data collection year: 75% of ABE learners; 68.7% of ESL learners and 59% of ESL-Citizenship learners remained in their program.

**Figure 4.2—Local Agency Population  
Enrollment Status of Learners Within Each Instructional Program (1997-98)  
(N = 115,906)**

Tables 4.1 and 4.4 present comparisons between the local agency population in 1997-98 and the local testing population for 1996-97. Progress data in 1996-97 reflected the local testing population only; however, demographic comparisons indicated the local testing population was representative of the total population and thus deemed acceptable for trend comparison.

A comparison of learner enrollment status during 1997-98 (Local Agency Population) with the previous year (Local Testing Population) indicates the percentage of learners who enrolled, but did not attend, decreased in all three instructional programs. Also, the percentage of ESL-Citizenship learners who remained in their program increased, and the percentage who left before completing their goal decreased. However, the opposite was seen among ABE learners with the percentage of those who remained slightly decreasing and those who left before completing their goal increasing (see Table 4.1). To better understand these and related issues, additional analyses assessing learner progress and results during the instructional period were performed and are presented in Chapter 6.

**Table 4.1 – Local Agency Population (1997-98) and Local Testing Population (1996-97)  
Two-Year Comparison of Learner Enrollment Status  
For Each Instructional Program**

Instructional Program	Data Collection Year	
	1996-97	1997-98
<b>ABE</b>		
Enrolled/Did not Begin Instruction	9.9%	6.3%
Remained in Program	75.0%	70.1%
Left Before Completing Goal	13.5%	19.2%
Other	1.5%	4.4%
<b>ESL</b>		
Enrolled/Did not Begin Instruction	15.3%	7.3%
Remained in Program	68.7%	70.5%
Left Before Completing Goal	14.6%	19.8%
Other	1.3%	2.4%
<b>ESL-Citizenship</b>		
Enrolled/Did not Begin Instruction	15.0%	5.9%
Remained in Program	59.0%	71.1%
Left Before Completing Goal	22.6%	13.6%
Other	3.4%	9.4%

*CASAS 1998*

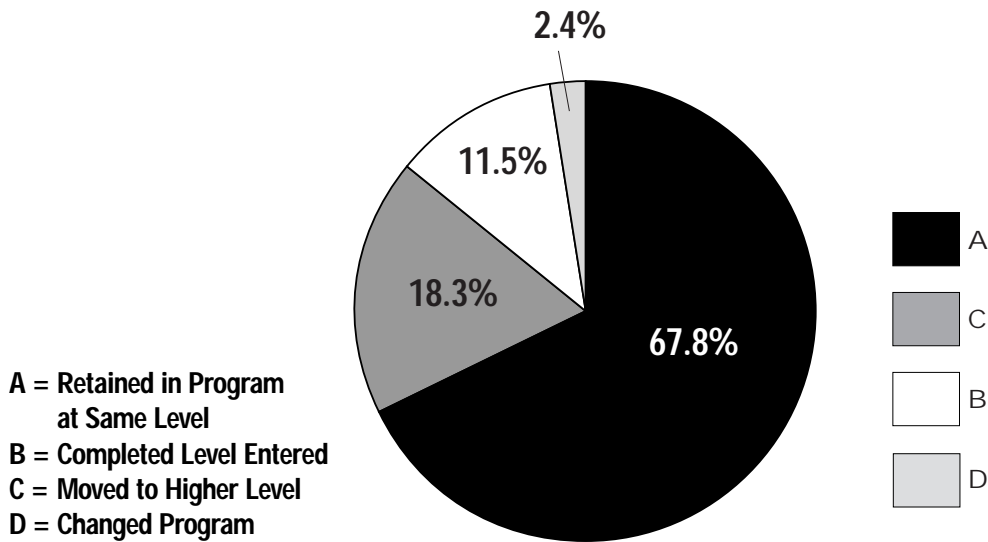

### **Learner Progress**

Learner progress data were analyzed for those learners who were remaining in the program at the time of the Student Update Record. Learner progress was examined using the four possible responses that created the previously discussed learner enrollment status option titled “Remained in Program.” Briefly, the four possible responses that were used to determine learner progress were these:

- Retained in program at same level
- Changed program
- Completed level/course
- Moved to a higher level

As seen in Figure 4.3, among those learners remaining in an instructional program at time of student update, the majority (67.8%) were retained at the same program level, 11.5% completed the level entered, 18.3% moved to a higher level, and 2.4% changed program.

**Figure 4.3 –Percentage at Each Level of Progress Among Learners Remaining in an Instructional Program at Student Update (1997-98)  
(Local Agencies Only: N = 81,757)**

CASAS 1998

*A comparison of the results with 1996-97 data shows a greater percentage of learners this year who completed a level and moved to a higher level. This decreased the percentage who were retained at the same level (Figure 4.4).*

**Figure 4.4 –Percentage of Learners Within Each Instructional Year at Various Levels of Progress (1996-97 to 1997-98)  
(1996-97: N=31,889; 1997-98: N=81,757)**

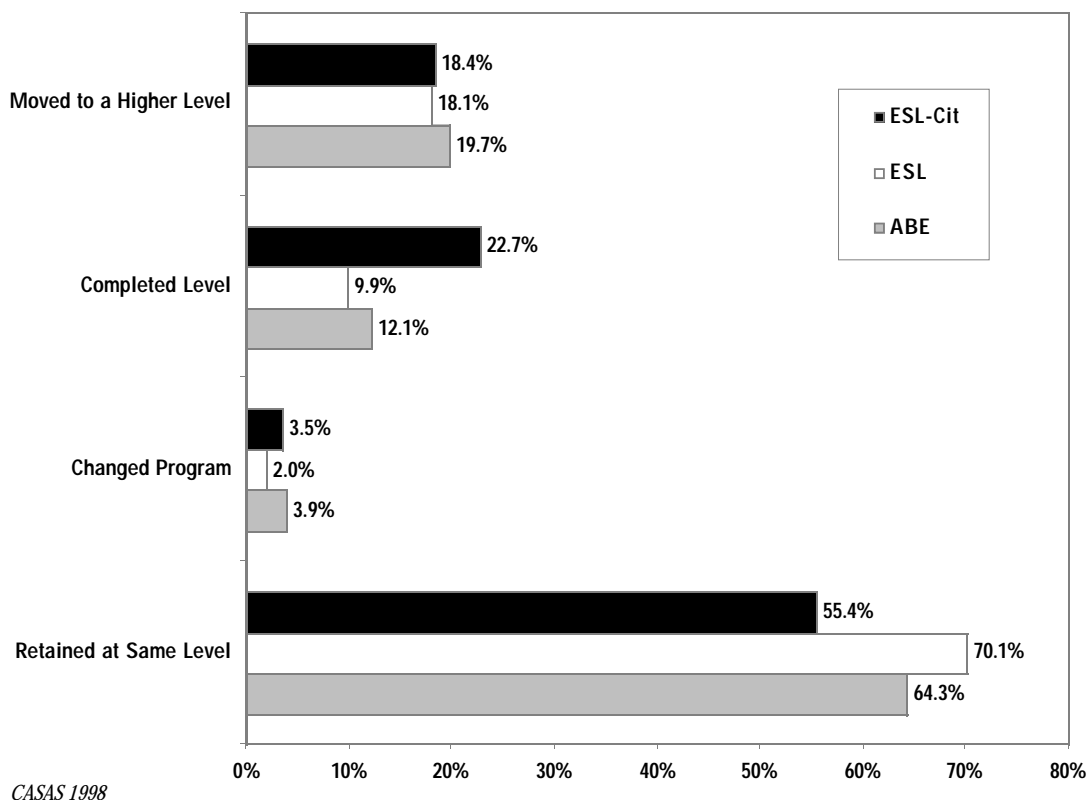

CASAS 1998

*-1996-97 data reflects the local testing population  
-1997-98 data reflects the local agency population*

Learners in all three instructional programs demonstrated success with at least 28% in each program reporting having completed the instructional level at which they entered or advanced to a higher level. Learners in ABE and ESL programs reported similar levels of progress overall. Among ESL-Citizenship learners, nearly twice as many reported completing their instructional level at entry as compared to learners in the other two programs. In addition, ESL-Citizenship learners represented the highest percentage moving to a higher level of instruction (see Figure 4.5).

**Figure 4.5 – Percentage of Learners Within Each Instructional Program at Each Level of Progress (1997-98)**

### Learner Results

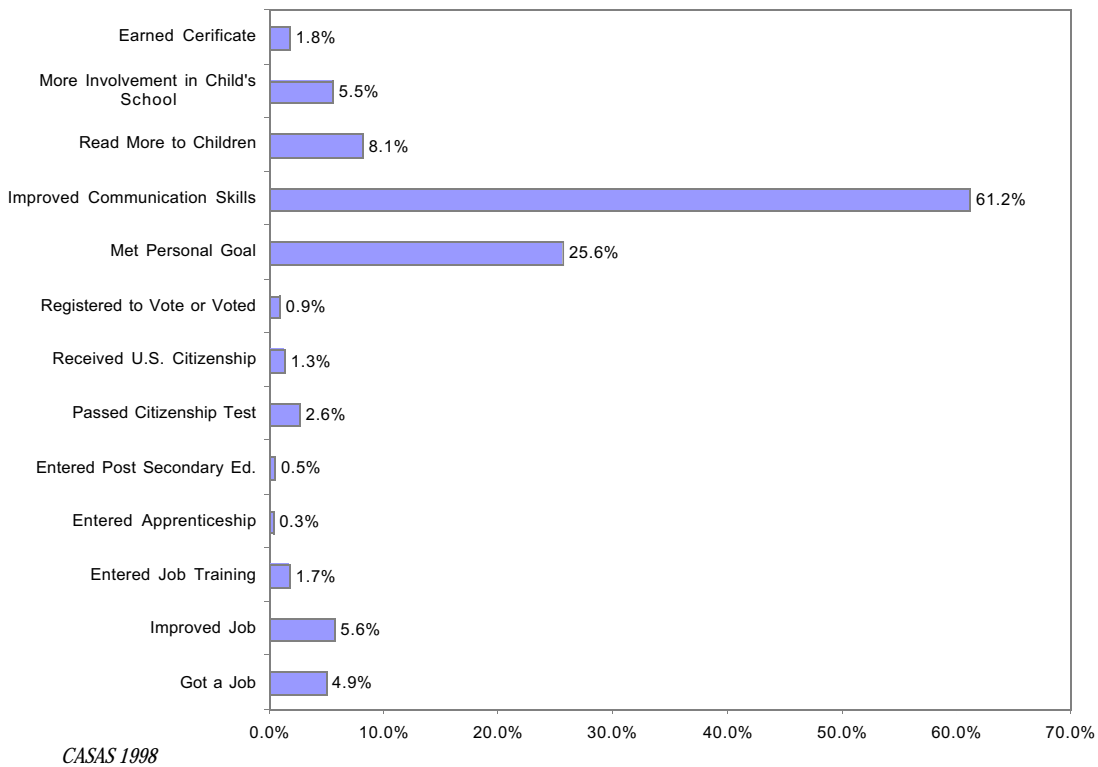

Learner results data were collected on the *Student Update Record* to document changes that occurred for learners during the instructional time period. Learner results are conceptualized as experiences that were realized by learners during the period of instruction. Respondents were asked to mark all outcomes that they experienced during the time of instruction. Percentages reported for learner results reflect the number of times a particular experience was selected out of the total number of learners who remained in any instructional program. The list of possible experiences:

- Got a job
- Got a better job or advanced in job
- Entered job training
- Entered apprenticeship
- Entered post-secondary education
- Passed citizenship test
- Received U.S. citizenship

- Registered to vote or voted
- Met personal goal
- Improved communication skills
- Read more to child
- Greater involvement in child's school
- Earned certificate (Note: a new response option in 1997-98)

Overwhelmingly, the two most common results reported by ABE 321/326 learners who remained in an instructional program (N = 81,757) were improved communication skills (61.2%) and met personal goal (25.6%). Figure 4.6 illustrates the percentage of learners endorsing each of the possible outcome categories.

**Figure 4.6 – Percentage of Learners Who Experienced a Particular Outcome During the Instructional Period (1997-98)**  
(N = 81,757)

### Learner Results by Primary Reason for Enrollment

As part of the Student Entry Record, learners were asked to indicate their primary reason for enrolling in one of the three instructional programs. Secondary reasons for enrollment were also indicated, and those results can be found in Appendix D, Table D1. Across every primary reason for enrollment, the first and second most frequently observed outcomes were “improved communication skills” and “met personal goal.” Differences among the selected outcomes are seen in the third most frequent experience selected within each reason for enrollment category. Table 4.2 contains all responses and highlights the three most frequent learner experiences for each enrollment category.

ABE 321/326 programs were effective at helping learners meet their enrollment goals. In reviewing the learner results (Table 4.2), the following can be seen.

- Nearly twice as many learners whose primary reason for enrolling was to get a job actually got a job than did other learners. In addition, these individuals were more likely to have earned a certificate than those who enrolled for reasons other than to get a job.
- Nearly twice as many learners who enrolled to improve their jobs actually got better jobs or advanced in their jobs than did other learners.
- More learners who enrolled for citizenship passed the citizenship test, received U.S. citizenship, and registered to vote or voted than did other learners.
- More learners who enrolled for an educational reason entered post-secondary education than did other learners.
- Learners who enrolled to improve their communication indicated they did improve their communication skills (69.7%). This result is higher for this group than for other learners.
- More learners who enrolled to meet a personal goal met their goal than did other learners.
- Learners who were mandated to enroll read more to their children and had a greater involvement in their children's school than other learners; mandated learners were also the highest category indicating they entered a job training program.

**Table 4.2 – Percentage of Learners Within Each Enrollment Category Experiencing a Particular Outcome During the Instructional Period (1997-98)**

Outcomes	Primary Reason for Enrollment													
	Education		Get a Job		Improved Job		Communication		Citizenship		Personal Goal		Mandated	
	N	%	N	%	N	%	N	%	N	%	N	%	N	%

CASAS 1998

### Learner Results by Instructional Program

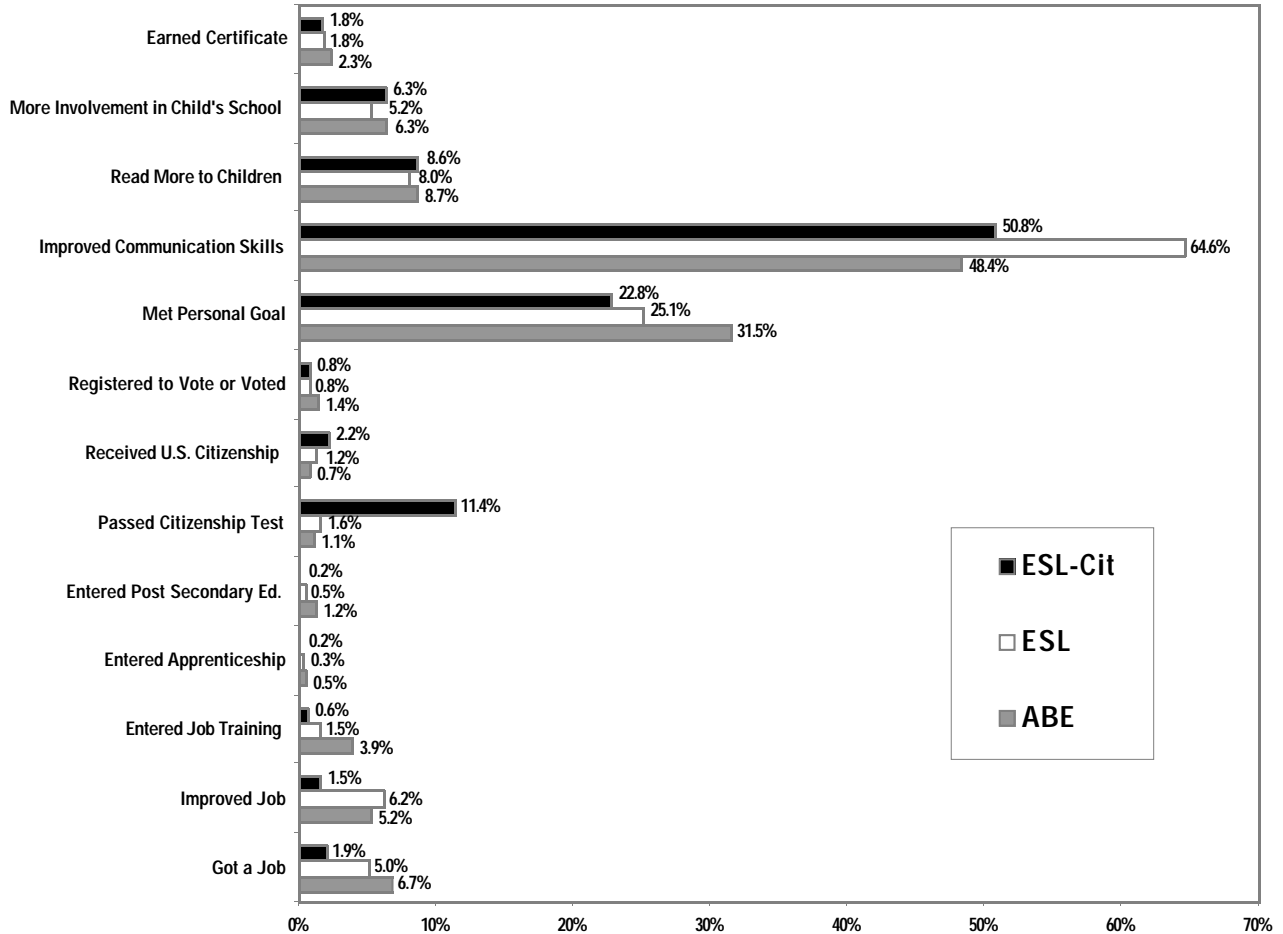

Improving communication skills and meeting a personal goal were also the most common results for learners in each of the three instructional programs:

- Among ABE learners who reported a result, 48.4% reported improving communication skills and 31.5% reported meeting a personal goal; third highest reported outcome was read more to child (8.7%).
- Among ESL learners who reported a result, 64.6% reported improving communication skills and 25.1% reported meeting a personal goal; third highest reported outcome was read more to child (8.0%).
- Among ESL-Citizenship learners who reported a result, 50.8% reported improving communication skills and 22.8% reported meeting a personal goal; third highest reported outcome was passing the citizenship test (11.4%).

\*\*Note: Percentages do not equal 100 because learners were asked to indicate all that apply. Results are representative of those learners who remained in an instructional program.

program. ESL-Citizenship learners reported the highest percentage of those passing the citizenship test (11.4%) and receiving U.S. citizenship (2.2%) as compared to ABE learners (1.1% and .7% respectively) and ESL learners (1.6% and 1.2% respectively). ABE learners reported higher percentages of those who got a job (6.7%), entered job training (3.9%) and earned a certificate (2.3%) as compared to ESL (5.0%, 1.5% and 1.8% respectively) and ESL-Citizenship learners (1.9%, .6% and 1.8% respectively). See Figure 4.7 for all other instructional program comparisons.

**Figure 4.7 – Percentage of Learners Within Each Instructional Program Experiencing a Particular Outcome During the Instructional Period (1997-98)**

CASAS 1998

\*\*Note: Percentages do not equal 100 because learners were asked to indicate all that apply; Results are representative of those learners who remained in an instructional program.

### **Reason for Leaving Early**

Some learners left their instructional programs before completing their educational or personal goals. Individuals were identified to be included in this group based on information provided by the instructor on the *Student Update Record*. Those identified as leaving before completing their instructional level or who enrolled but did not attend were included. Information on the reasons learners left early was gathered by instructors, from the learners themselves, or from classmates still in the program. Reasons for leaving early were captured through one of fourteen options:

- Got a job: Learner left to take a job.
- Moved: Learner moved out of the program service area.
- Schedule conflict: Learner could not maintain the program schedule due to conflicts with work or family schedules.
- Transportation: Learner could not find, fund, or maintain adequate transportation to and from the instructional program.
- Child care: Learner left because of child care needs.
- Family: Learner left because of family needs other than child care.
- Own health problems: Learner left because of own health problem.
- Dependent's health problems: Learner left due to health problems of a family member.
- Lack of interest: Learner left due to a lack of interest in the program.
- Public safety: Learner left due to concern for personal safety, such as fear of riding the bus or walking through dangerous neighborhoods.
- Administratively separated: Learner was dismissed by the school administration for cause.
- Incarcerated: Learner was unable to continue participation due to being incarcerated. This does not apply to learners in corrections education or training.
- Other known reason: Learner reason for leaving the program was known, but does not fit in any of the categories above.
- Unknown reason: Learner left for a reason unknown to the staff or classmates.

Respondents were instructed to mark only one reason for leaving early. However, after the data were received, it was apparent that a substantial number of individuals marked more than one reason. *It appears that many learners leave early for a multiplicity of reasons, not just a singular reason.* Rather than excluding their data from analysis, the decision was made to allow multiple marks for this field. Thus, the percentages reflect the number of times a particular category was selected by respondents as a reason for leaving early.

### **Reason for Leaving Early by Instructional Program**

Of those who left their programs early, 45.6% did so for an unknown reason; that is, their instructors did not know why they had left. Of the remaining reasons, schedule conflicts (10.2%), employment acquisition (7.7%), and relocation out of the service area (6.8%) were the next most frequently cited for leaving early. See Figure 4.8 for percentages of endorsement of all other reasons for leaving among those learners who left their program early.

**Figure 4.8 – Percentage of Respondents Citing Different Reasons for Leaving Instructional Program Prior to Completion (1997-98) (N = 30,221)**

CASAS 1998

Similar to the overall findings regarding the reasons for early departure among program participants, the highest percentage of learners within each program left for a reason unknown to the instructor: ABE: 40.3%; ESL: 46.5%; and ESL-Citizenship: 44.8%. Further inspection of Figure 4.9 indicates the following:

- ABE learners presented the highest percentage of those indicating that they had moved from the program service area (9.6%) followed by ESL learners (6.5%) and ESL-Citizenship learners (5.7%).
- Scheduling conflicts were equally endorsed among ESL and ESL-Citizenship learners (10.6%) with fewer endorsements among ABE learners (7.3%).
- ABE learners were the only program participants reporting incarceration as a reason for leaving prior to program completion (2.1%).

**Figure 4.9 – Percentage of Respondents Citing Different Reasons for Leaving Instructional Program Prior to Completion Within Each Instructional Program (1997-98) (N = 30,221)**

CASAS 1998

**Reason for Leaving Early by Gender**

Most learners who left before completing their instructional program did so for unknown reasons (males: 47.5%; females: 44.2%). Among males, schedule conflicts (11.9%) and employment acquisition (8.3%) were the most common reasons for leaving an instructional program before completion. Among females, schedule conflict was the most commonly known reason for leaving early (9.0%) followed by employment acquisition (7.2%). It is also interesting to note that nearly 10 times as many women left early due to child care problems than did men. See Table 4.3 for all other percentages (Highlighted cells indicate top three percentages).

**Table 4.3 – Percentage of Respondents Citing Different Reasons for Leaving Instructional Program Prior to Completion by Sex (1997-98)**

	Sex			
	M (N=12,612)		F (N=17,452)	
	N	%	N	%
Got a Job	1,047	8.3	1,260	7.2
Moved	891	7.1	1,164	6.7
Schedule Conflict	1,504	11.9	1,565	9.0
Transportation	138	1.1	328	1.9
Child Care	55	0.4	705	4.0
Family Problems	197	1.6	790	4.5

Other Known Reason	494	3.9	626	3.6
Unknown	5,996	47.5	7,720	44.2

CASAS 1998

### Reason for Leaving Early by Age

Age group comparisons were also conducted to identify patterns of barriers (if any) that might lead to early withdrawal for any particular age group. As seen in Table 4.4, the second and third most common barrier or reason for leaving early were conflicts with schedules (10.5% on average across age groups endorsed this barrier) and employment acquisition (8.9% on average across age groups endorsed this barrier). Not too surprising, among the 61 and older group, the two most frequently cited reasons for leaving early were personal health problems (10.1%) and moving out of the service area (10.1%). Learners in this age group would be expected to experience more health problems associated with aging as they would be more likely to relocate to nursing homes, family quarters, or other living arrangements possibly outside the service area.

**Table 4.4 – Percentage of Respondents Citing Different Reasons for Leaving Instructional Program Prior to Completion by Age (1997-98)**

	Age													
	<18		18-20		21-30		31-40		41-50		51-60		>60

CASAS 1998

## Learner Profile of the Local Testing Population: How Well Does the Local Testing Population Represent the Total Local Population?

*Chapter Five discusses learner characteristics of the local testing population. Each year a sample of local agencies is selected and required to administer CASAS pretests and post-tests to learners to measure learning gains. Data regarding gender, ethnic background, native language, age, years of education, and highest degree earned are presented in this chapter. Additional data comparing the local testing population to the local agency population can be found in Appendix E.*

### Data Highlights

- Sample data from testing agencies were included for a total of 94,914 learners enrolled in 129 local agencies.
- The sex and age percentages for the local testing population did not vary greater than 1% from the local agency population in any one category.
- The highest degree earned percentages for the local testing population did not vary greater than 2% from the local agency population in any one category.
- The ethnic categories and the years of education for the local testing population did not vary greater than 3% from the local agency population in any one category.
- The testing sample did not differ from the local population on other key variables including primary reason for enrollment, learner progress, and learner results.
- Based on the results of the comparative analyses, the local testing population was determined to be representative of the local agency population.

## REPRESENTATIVENESS OF THE LOCAL TESTING POPULATION

### Sampling Procedure

A stratified sample of local agencies who were funded for the 1996-97 fiscal year were selected and required to administer CASAS pretests and post-tests. The sampling agencies are selected from the local agencies using the following protocol:

1. Each ABE 321/326 local agency is categorized into one of six local agency provider types: adult school, community college, community-based organization, library literacy program, county office of education, or jail program.
2. Within each provider type, the 10% largest agencies based on HHUs (Hundred Hour Units) are automatically assigned to be a testing agency.
3. Within each provider type, the remaining agencies are assigned a computer-generated, random number.
4. Within each provider type, one third of the numbers are randomly selected using a computer program, and these agencies are designated as testing agencies.

A detailed listing of the agencies included in the 1997-98 sample of local testing agencies is contained in Appendix A.

### Program Information

Sample data from testing agencies were included for a total of 94,914 learners enrolled in 122 local agencies, which represents 62% of learners in the local agency population. Table 5.1 presents the testing population by provider type.

**Table 5.1 – Local Testing Population  
Provider Type (1997-98)**

Provider Type	N	Percent
Adult Schools	77,834	81.9
Community Colleges	13,672	14.4
Community-based Organizations	1,476	1.6
Library Literacy Programs	540	.6
County Offices of Education	1,392	1.5

\* Testing information for learners in the jail programs was included in the adult school provider type.  
CASAS 1998

Figure 5.1 presents the percentage of learners in each of the three instructional programs for the testing population. Of the 94,914 learners indicating an instructional program, a total of 11,965 learners (12.6%) were in ABE, 75,981 learners (80.1%) were in ESL, and 6,968 learners (7.3%) were in ESL-Citizenship. These percentages compare favorably to the local agency population whose learners were distributed as follows: 12.6% ABE, 76.5% ESL, and 10.9% ESL-Citizenship.

**Figure 5.1 – Local Testing and Total Local Population  
Distributions of Learners by Instructional Program (1997-98)  
(Local Testing: N = 94,914; Total Local: N=149,221)**

Comparisons of the instructional levels for testing agencies with the levels seen in the local agency population are also contained in Appendix E, Table E1.

In order to demonstrate that the respondents in the testing sample adequately represent the total local population, comparisons across key demographic variables were conducted. These comparisons were performed to provide evidence supporting the generalizability of findings and conclusions. In other words, observations and conclusions based on the 94,914 respondents in the testing sample are more easily and appropriately generalized or extrapolated to the total population (N=149,221) if it can be shown that the two groups share key demographic characteristics.

### Demographics

The sex and age percentages for the testing agencies did not vary greater than 1% from the local agency population in any one category (see Table E2, Appendix E). In addition, percentages within each category of highest degree earned varied less than 2% between the two groups (see Table E3, Appendix E). The ethnicity and years of education variables were also very similar with no two categories varying more than three percentage points (see Tables E4 and E5, Appendix E). Lastly, the native language variable demonstrated the highest percentage discrepancies with categories differing by only 5% at most. (see Table E6 in Appendix E). Given this remarkable consistency, CASAS determined that the demographics among the testing agency learners were representative of the local agency population.

### Reasons for Enrollment, Learner Progress, and Learner Results

In addition to demographic comparisons, other important characteristics such as primary reasons for enrollment, learner progress, and learner results were also assessed. As can be seen in Figure 5.2, no two categories differed by more than 2% regarding learners' primary reason for enrollment.

**Figure 5.2 – Percentage of Learners in Each Population Reporting Their Primary Reason for Enrollment (1997-98)**

As mentioned in previous chapters, learner progress data are analyzed for those learners who remained in an instructional program at the time of completing the Student Update Record. The four possible responses that are used to determine Learner Progress:

- Retained in program at same level
- Changed program
- Completed level/course
- Moved to a higher level

Figure 5.3 demonstrates that both populations are comparable in terms of overall student progress. Lower percentages of learners in the testing population were evidenced in three of the four progress categories with the largest discrepancy only 2.8%. Roughly, 3.8% more learners in the testing population were retained at the same level of instruction at update.

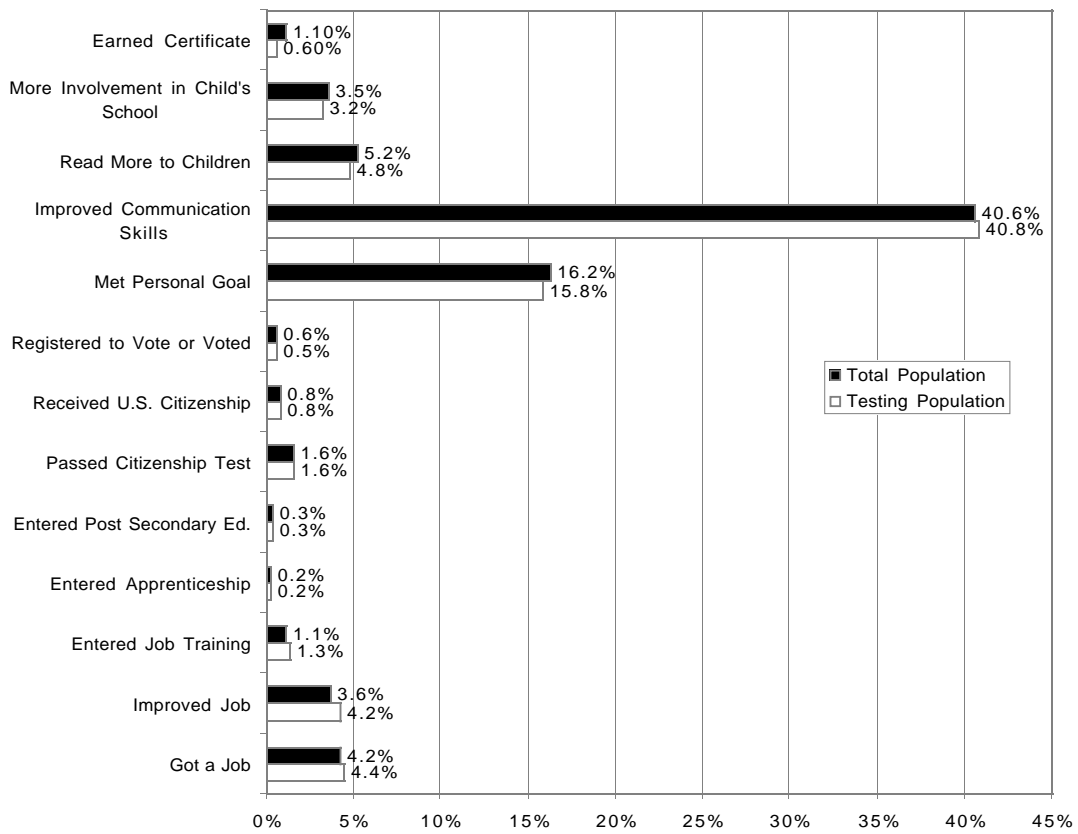

**Figure 5.3 – Percentage of Learners In Each Population at Various Levels of Progress (1997-98)**  
 (Total Population: N = 81,757; Testing Population: N = 53,206)

CASAS 1998

Learner results data were collected to document changes that occurred for learners during the instructional time period. As mentioned in the previous chapter, learner results were conceptualized as experiences that were realized by learners during the period of instruction. Remarkably, 12 of 13 possible experiences differed by less than 1% of learners indicating a very high level of representativeness (See Figure 5.4).

**Figure 5.4 – Percentage of Learners In Each Population Who Experienced a Particular Outcome During the Instructional Period (1997-98)**  
 (Total Population:  $N = 149,221$ ; Testing Population:  $N = 94,914$ )

CASAS 1998

## Test Scores and Learner Gains for the Local Testing Population: What Improvement Was Seen in Learners?

*Chapter Six provides information about test scores and learning gains in California's ABE 321/326 programs. The chapter is based on data from the local testing population, that is, those agencies that were selected and required to administer CASAS pretests and post-tests to students to measure learning gains. Learning gains were measured after 75 to 120 hours of instruction, and were computed as the difference in learners' scores on a CASAS pre- and post-test.*

### Data Highlights

- Reading pretest scores were compiled from an overall sample of 37,589 learners: 4,743 ABE, 30,166 ESL, and 2,680 ESL-Citizenship.
- Overall mean reading pretest scores were 222.7 for ABE learners, 210.6 for ESL learners, and 206.4 for ESL Citizenship learners.
- ESL-Citizenship learners demonstrated the lowest skill levels at program entry with 56% scoring 210 or below.
- ESL-Citizenship learners produced the highest average reading gain (6.1 points), followed by ESL learners (5.4 points) and ABE learners (4.1 points).
- Average ESL learner listening gain was 3.1 points on the CASAS scale.
- Adult schools and CCDs served higher-scoring ABE students on the reading pretest at program entry.

## TEST SCORES AND LEARNING GAINS

### Pretest Scores

As part of the process used to monitor learning gains in California's ABE 321/326 adult education programs, a sample of learners was pretested during the first month of the fall semester. CASAS reading, listening, or math survey achievement tests were administered to assess learners' abilities to apply basic skills in a functional context. In some agencies, learners were assessed in more than one of these skill areas. Learners in the ABE 321/326 program were later post-tested after 75 to 120 hours of instruction. Learners' pretest scores were then used in combination with post-test scores to compute learning gains.

### CASAS Scores

Test results were reported using CASAS scaled scores. The California State Plan identifies a CASAS scaled score of 230 as the established literacy benchmark for learners in adult education programs. Adult education programs receive supplementary ABE 321/326 funding to serve only those who score below a 230 on the pretest. Learners with a score of 230 and above are able to perform in routine work and social situations and are able to benefit from instruction in high school or GED level programs. Learners who scored 230 or above, and are therefore not a part of the federally-funded ABE 321/326 program, were not included in any of the learning gains or goal attainment analyses.

### Reading Pretest Performance

Learners were tested primarily in reading, but ABE programs did have the option to give either reading or math tests, depending on the instructional focus. Under statewide guidelines, ESL learners were administered a reading test, a listening test, or both.

Reading pretest scores were compiled from an overall sample of 37,589 learners: 4,743 ABE, 30,166 ESL, and 2,680 ESL-Citizenship. The mean reading pretest score among ABE learners was 222.7, for ESL learners it was 210.6, and for ESL-Citizenship learners it was 206.4. Table 6.1 illustrates mean reading pretest scores for each of the three instructional programs.

**Table 6.1 – Mean Reading Pretest Scores Across Each Instructional Program for the 1997-98 Testing Population**

Score Range	Mean Score	N	%
<b>ABE</b>			
<200	188.4	368	7.8%
201-210	205.9	317	6.7%
211-220	216.4	969	20.4%
221-229	225.0	1600	33.7%
230+	236.3	1489	31.4%
<b>ABE Overall</b>	<b>222.7</b>	<b>4743</b>	<b>100.0%</b>
<b>ESL</b>			
<200	189.5	8168	27.1%
201-210	205.4	5687	18.9%
211-220	215.9	7551	25.0%
221-229	224.7	5605	18.6%
230+	236.3	3155	10.5%
<b>ESL Overall</b>	<b>210.5</b>	<b>30166</b>	<b>100.0%</b>
<b>ESL /Citizenship</b>			
<200	189.0	950	35.4%
201-210	205.2	550	20.5%
211-220	215.5	650	24.3%
221-229	224.4	391	14.6%
230+	235.5	139	5.2%
<b>ESL /Citizenship Overall</b>	<b>206.3</b>	<b>2680</b>	<b>100.0%</b>

CASAS 1998

The mean reading pretest score for ABE learners suggests that learners would, on average, be able to handle basic reading, writing, and communication tasks; however, more complex literacy tasks including technical writing, interpreting complex charts, or following multi-step procedures would prove too difficult. Scores for the ESL learners, and especially the ESL-Citizenship learners, suggest that these individuals would, on average, have difficulty interpreting most job-related material.

Looking at the distribution of learners within each score range one can determine differences in skill levels across each instructional program at the time of program entry (See Figure 6.1). Slightly more than 87% of all learners fell below the benchmark 230 in reading. Not surprising, the percent scoring below this benchmark varied across instructional program: 68.6% of ABE learners, 89.5% of ESL learners, and 94.8% of ESL-Citizenship learners. Further inspection of Figure 6.1 confirms that ABE learners demonstrated the highest skill levels at program entry with the lowest percentage of learners scoring below 210 on the pretest: 14.4% of ABE learners, 45.9% of ESL learners, and more than half (56%) of ESL-Citizenship learners. It is likely that learners scoring above the 230 benchmark on the reading test were administered another skill test (such as math) and they scored below 230 in the other skill area. Learners who score below the 230 benchmark in any skill area are eligible for ABE 321/326 funding.

**Figure 6.1 – Comparison of Mean Reading Pretest Scores Across Instructional Programs for the 1997-98 Testing Population**

**Math Pretest Performance**

Math pretest scores were compiled from a total of 439 ABE learners. Learners who took the CASAS math assessment scored an average of 216.4 (mean). The highest percentage of learners (31.2%) scored between 211 and 220, while 30.8% scored 210 or below. Table 6.2 illustrates mean math pretest scores at various levels of the CASAS scale.

**Table 6.2 – Mean Math Pretest Scores at Various Levels of the CASAS Scale for the 1997-98 ABE Testing Population**

Scoring Range	Mean Score	N	%
<200	193.6	45	10.3%
201-210	206.4	90	20.5%
211-220	216.2	137	31.2%
221-229	224.5	112	25.5%
230+	235.0	55	12.5%
ABE All	216.3	439	100.0%

CASAS 1998

### Listening Pretest Performance

Listening pretest scores were compiled from a total of 5,963 learners, of which 5,796 were ESL and 167 were ESL-Citizenship. The overall average listening pretest score among ESL learners was 205.4, while the ESL-Citizenship learners scored slightly lower with a mean of 204.7. Among ESL learners, a total of 66.7% scored at or below the Beginning and Low Intermediate levels based on their pretest scores. Similarly, 65.2% of ESL-Citizenship learners scored in these same regions. See Table 6.3 for all other comparisons.

**Table 6.3 – Mean Listening Pretest Scores at Various Levels of the CASAS Scale for the 1997-98 ESL and ESL-Citizenship Testing Population**

Score Range	Mean Score	N	%
<b>ESL</b>			
<200	192.6	1,858	32.1%
201-210	205.6	2,005	34.6%
211-220	215.1	1,464	25.3%
221-229	223.4	469	8.1%
<b>ESL Overall</b>	205.3	5,796	100.0%
<b>ESL/Citizenship</b>			
<200	191.7	57	34.1%
201-210	205.2	52	31.1%
211-220	214.9	42	25.1%
221-229	221.9	16	9.6%
<b>ESL/Citizenship Overall</b>	204.6	167	100.0%

*CASAS 1998*

Among ESL learners, the highest percentage (34.6%) scored between 201 and 210. This differed somewhat from ESL-Citizenship learners who presented scores at or below 200 more frequently (34.1%) than any other category. Overall, the two groups of learners did not evidence any marked differences in score distribution especially at the higher end (see Figure 6.2).

**Figure 6.2 – Comparison of Mean Listening Pretest Scores for the 1997-98 ESL and ESL-Citizenship Testing Population**

ESL mean listening scores have continued to increase during the years 1992-93 to 1997-98, from 200.2 in 1992-93 to 205.4 in 1997-98. Among ESL-Citizenship learners, higher pretest listening scores are evidenced this year as compared to 1996-97 (204.7 vs. 202.7). While this suggests that learners are entering ESL-Citizenship programs with higher listening skills, more than a third are still entering at or below the beginning level (<200).

### Learning Gains

Learning gains were computed as the difference between learners' scores on the pretest and the post-test after 75 to 120 hours of instruction. For example, if a group of learners scored a mean of 200 on the reading pretest and a mean of 205 on the post-test, their mean gain would be five points.

### Reading Learning Gains

From the 37,589 learners who were pretested, 8,970 (23.9%) provided usable post-test data that was included in the following analyses. While this may seem like a relatively low proportion of usable protocols, it should be noted that only those learners who remained in their program for a minimum of 75 hours and who could be matched on personal demographic data were included in the analyses.\*

\*Note: Pre- and post-tests were matched using learner-provided information including learner identification number. In many instances, this information was either missing or was inconsistent from pre- to post-test.

Differences in reading learning gains between pre- and post-test were evidenced across program type. ESL-Citizenship learners presented the highest average reading gain (6.1 points), followed by ESL learners (5.4 points), and lastly, ABE learners (4.1 points). This relationship reflects a pattern just opposite of the pretest score distribution as illustrated in Figure 6.1. At the time of pretest, ESL-Citizenship learners presented the lowest level of performance and consequently had the furthest to develop. Conversely, ABE students presented the highest pretest scores possibly inducing a ceiling effect on scores at post-test. This is consistent with the pattern of learning gains seen across program type (See Table 6.4).

**Table 6.4 – Mean Reading Learning Gains Across and Within Program Type (1997-98)**

Range	Pre-Test	Mean Learning Gains	N	%
<b>ABE</b>				
<200	189.9	6.1	44	8.6%
201-210	205.9	7.5	52	10.2%
211-220	216.2	5.1	170	33.2%
221-229	224.6	2.3	246	48.0%
<b>ABE Overall</b>	216.9	4.1	512	100.0%
<b>ESL</b>				
<200	189.9	9.2	2,083	26.7%
201-210	205.5	5.5	1,714	21.9%
211-220	215.9	4.0	2,324	29.7%
221-229	224.7	2.2	1,685	21.6%
<b>ESL Overall</b>	208.6	5.3	7,806	100.0%
<b>ESL/Citizenship</b>				
<200	188.9	9.2	232	35.6%
201-210	205.0	5.6	134	20.5%
211-220	215.4	4.6	173	26.5%
221-229	224.3	2.3	113	17.3%
<b>ESL/Citizenship Overall</b>	205.4	6.1	652	100.0%

CASAS 1998

A comparison of learner gains at each pretest score level shows that, in general, the lower the learners' pretest scores, the greater the average gain after 75 to 120 hours of instruction. ABE learners' gains ranged from an average of 2.3 points for learners' at the 221-229 pretest level to 7.6 points for learners' at the 201-210 level. Among ESL learners, average gains ranged from 2.3 points at the 221-229 pretest level to 9.2 points for learners scoring at or below 200 on the pretest. ESL-Citizenship learners presented an identical pattern of reading gains as ESL learners as can be seen in Table 6.4.

At each pretest score range, and for all the score ranges combined, ESL learners with seven or more years of education presented higher average reading learning gains than did those with six or fewer years of education. In all but one case (learners scoring between 221-229), learners with six or fewer years of education presented lower average learning gains than those with seven or more, years of formal education (See Table 6.5).

**Table 6.5 – Mean Reading Learning Gains by Years of Education  
For ESL and ESL-Citizenship Learners (1997-98)**

Score Range Pre-Test	< 6 Years			> 7 Years		
	Learning Gains	N	%	Learning Gains	N	%

CASAS 1998

### Learning Gains Over Time

ABE reading gains have, on average, risen between the years 1993 and 1996, increasing from 4.1 points to 5.5 points on the CASAS scale. Interestingly, this year's (1997-98) reading gains among ABE learners show more overall similarity to those obtained in 1993-94 and especially at the upper end of the scale (scores between 221-229). See Table 6.7 for all other comparisons.

**Table 6.7– Mean Reading Learning Gains for the ABE Sample  
(1993-94 to 1997-98)**

	1993-94		1994-95		1995-96		1996-97		1997-1998

CASAS 1998

Average reading gains among ESL learners have either decreased or leveled off with the exception of those scoring between 181-190 and 191-200 on the CASAS scale. Average reading gains increased in these categories (1.5 points and .7 points respectively). See Table 6.8 for all other comparisons.

CASAS 1998 \* Data not collected.

Reading gains among ESL-Citizenship learners have increased over previous years for all learners with the exception of those at the lowest level (165-180). A 3.1 point average decrease was evidenced among learners scoring between 165-180 at pretest. Overall, ESL-Citizenship learners' average reading gain increased from 5.3 points last year to 6.1 points in 1997-98. See Table 6.9 for annual comparisons at all scoring levels.

CASAS 1998 \* Data not collected.

Overall ESL Listening gains declined between 1993-94 and 1997-98, from 4.3 points on the CASAS scale to 3.1 points. Only those individuals scoring between 181-190, 211-220, and 221-229 evidenced an increase in mean listening gain from last year; learning gains for all other pretest score ranges either declined or remained relatively similar (see Table 6.10).

### Assessment Results by Provider Type

ABE 321/326 providers differed in the proportions of learners they served at various pretest score levels. Analyses were conducted across provider types for each of the three program types: ABE, ESL, and ESL-Citizenship.

School district adult schools and community college districts served ABE learners with the highest average reading pretest scores in 1997-98 (223.3 and 223.4, respectively). Library literacy providers served the lowest average scoring learners (mean = 213.7). Four-year comparisons can be seen in Table 6.11.

**Table 6.11– Mean Reading Pretest Scores Across Provider Type for the ABE Sample (1993-94 to 1997-98)**

	1993-94		1994-95		1995-96		1996-97		1997-98

CASAS 1998

Among ESL learners, community college district and CBOs served learners with the highest pretest reading scores in 1997-98 (212.1 for both), while library literacy programs provided services to the lowest average scoring learners (196.3). Adult school providers served learners with a mean pretest reading score of 210.2 on the CASAS scale. While this pattern appears to significantly differ from previous years, caution should be exercised when interpreting these trends as a significant decrease in sample size occurred among CBO and library literacy providers (see Table 6.12).

**Table 6.12– Mean Reading Pretest Scores Across Provider Type for the ESL Sample (1993-94 to 1997-98)**

	1993-94		1994-95		1995-96		1996-97		1997-98

CASAS 1998 \* Data not collected.

The overall mean pretest listening score among ESL learners was 205.4 on the CASAS scale. Community college districts served the highest performing learners (mean pretest score = 208.5), followed by library literacy, adult school, and CBO providers (mean pretest scores = 204.7, 204.1, and 196.8, respectively). Again, caution should be exercised when interpreting these data as CBOs and library literacy providers were not strongly represented (see Table 6.13).

**Table 6.13– Mean Listening Pretest Scores Across Provider Type for the ESL Sample (1993-94 to 1997-98)**

CASAS 1998 \* Data not collected.

Among ESL-Citizenship learners, the highest mean reading pretest scores were evidenced by those served by community colleges (208.8). Adult school providers served the second highest scoring learners with an average pretest score of 207.1, followed lastly by CBOs (mean = 200.6). Library literacy providers were dropped from the analysis due to a lack of data (N = 1). This pattern is consistent with 1995-96 and 1996-97 findings (see Table 6.14).

**Table 6.14– Mean Reading Pretest Scores Across Provider Type for the ESL-Citizenship Sample (1995-96 to 1997-98)**

## Program Services for the Total Population: What Program Characteristics Were Evidenced by Learners?

*Chapter Seven provides information about program services in California's ABE 321/326 programs. Class questionnaire data were collected from a sample of classes in California ABE 321/326 programs – school district adult schools, community-college districts, community-based organizations, library literacy programs, CDC, and CDDS – during the census period of September 1 to October 17, 1997. Program service information includes the time of day classes met, the number of learners in each class, the number of hours the class met each week, classroom support, the emphasis of classroom instruction, primary instructional setting, and primary physical setting.*

### Data Highlights

- Sample data from 2,131 classes were included for analysis of program characteristics.
- An overall majority of classes (51.7%) were held in the morning followed by evening classes (36.9%) and lastly, afternoon classes (11.4%).
- ABE 321/326 classes averaged 21 learners per class.
- CCD programs had the highest class average (22) learners per class, followed by adult school programs (21).
- CDC programs evidenced the highest average weekly hours of instruction (29.6) followed by CDDS (18.4) and Adult Schools (12.3).
- The greatest emphasis of classroom instruction for ABE 321/326 programs overall was placed on general life skills.
- The majority (56.7%) of classes were held at adult schools; 11.4% were held at community colleges; 8.7% were held at correctional facilities; and 6% were held at high schools.

### PROGRAM SERVICES

Classroom questionnaire data was compiled from a total of 2,131 instructors from the total enrollment population. Due to changes in the methods used to collect data from 1996-97 to 1997-98, this year's data will represent individual classes rather than learners as was done in previous years. In addition, only those agencies providing data on at least 20 classes will be included in the analyses. Data will be displayed across provider type using variables most appropriate for discussion.

### Time of Day Class Met

Most ABE 321/326 classes were held during the morning (51.7%) or evening (36.9%) hours. A look at patterns of class meeting times within provider type shows that all providers held a majority of their classes in the morning (ranging from 41.3% to 96.0%). In addition, adult schools, CCDs, and CBOs were more likely than other providers to hold classes in the evening than in the afternoon. (See Table 7.1).

**Table 7.1 – Percentage of Classes Within Each Provider Type  
Held at Different Times of the Day (1997-98)  
(N = 2,017)**

	<b>Morning</b>	<b>Afternoon</b>	<b>Evening</b>
Adult School	45.1%	10.5%	44.3%
CCD	51.3%	15.4%	33.3%
CBO	41.3%	19.6%	39.1%
Lib/Lit	71.4%	14.3%	14.3%
CDC	96.0%	3.2%	80.0%
CDDC	83.2%	14.3%	2.5%

### **Class Size**

Class size was determined by the number of learners in each class *at the time of post-test*. Among the 2,131 questionnaires, 1,925 provided class size information. Overall, ABE 321/326 classes averaged 21 learners. Average class size was also determined for six of the ten provider types. CCDs had the highest class average (22), followed by adult schools (21), CDC programs (20), library literacy programs (19), CBOs (14), and lastly, CDDC programs (13). The majority of library literacy programs provide one-on-one instruction to students. The average class size of 19 reported here represents the average class size of those library literacy programs who provide instruction in a classroom setting.

### **Weekly Hours of Instruction**

Among the sample of instructors responding to the class questionnaire, 2,051 provided information regarding the number of hours classes met each week. On average, ABE 321/326 classes provided 13.4 hours of instruction per week. CDC programs indicated the most weekly instruction with an average of 29.6 hours. CDDC programs provided the second highest amount with 18.4 hours followed by adult schools (12.3 hrs.). Community college district programs reported the fewest hours of weekly instruction with an average of 9.9. See Figure 7.1 for all other comparisons.

**Figure 7.1 – Average Hours of Weekly Instruction Across Provider Type  
Held at Different Times of the Day (1997-98)  
(N = 2,051)**

## Classroom Support

Information regarding instructional support and the use of technology in the classroom was obtained from 2,059 respondents. Instructional support is operationalized as having a teacher's aide or tutor available to the class at least once a week. Instructional technology in the classroom is defined as learners using computers as part of the classroom experience. Lastly, information regarding Internet access was also obtained.

Overall, only one-third of all ABE 321/326 learners attended classes which utilized instructional aides or tutors. Among the various provider types, four of the six agencies (CBOs, Libraries, CDC, and CDDS) providing data reported at least 50% of their classes having instructional support. California Department of Corrections programs reported 83.2% of their classes having instructional support. This is more than three times the amount reported by adult school and CCD programs. See Figure 7.2 for comparisons across provider type.

**Figure 7.2 – Percentage of Classes Within Each Provider Type Having Instructional Support (1997-98)**  
(N = 2,059)

CASAS 1998

More than one third (41%) of all ABE 321/326 learners were in classes that used computers as part of the classroom learning experience. This represents a 3% increase from last year. Among those using computers as part of their class, 23% reported having Internet access. This represents a 17.4% increase from last year.

CDC instructors reported the highest percentage of classes (49.6%) utilizing computers as part of the learning experience. However, for security reasons, none of these classes is able to provide Internet access. Among the remaining providers that supplied data, all types with the exception of library literacy programs used computer technology in the classroom. See Figure 7.3 for comparisons across provider type.

**Figure 7.3 – Percentage of Classes Within Each Provider Type Using Computers as Part of the Learning Experience (1997-98)**  
(N = 2,057)

CASAS 1998

Regarding Internet access, adult school instructors reported the highest percentage of classes (28.3%) having access to the Internet followed by CCDs (15.5%). Of those reporting computer technology use in the classroom, all but the state agencies (CDC and CDDS) reported some Internet access. See Figure 7.4 for all other comparisons.

**Figure 7.4 – Percentage of Classes Within Each Provider Type Using Computers Having Internet Access (1997-98)**  
(N = 835)

CASAS 1998

### Emphasis of Classroom Instruction

Instructors were asked to rate the emphasis that was placed on each of five content areas during the instructional period. The content areas included: Employability/Workforce Literacy, Family Literacy, General Life Skills, Citizenship, and Learning to Learn/Study Skills. The greatest emphasis of classroom instruction for ABE 321/326 programs overall was general life skills. General life skills were given “major emphasis” 73.3% of the time to ABE 321/326 learners. See Figure 7.5 for comparisons across provider type.

**Figure 7.5 – Overall Percentage of Class Emphasis on Each of Five Content Areas (1997-98)**  
(N=2,017)

General life skills were emphasized most in classes across all provider types. Community college district, adult school, CDDS, and library literacy programs all put a great deal of effort in teaching general life skills with percentages ranging from 72.7% to 87.5% of classes placing a “major emphasis” on these issues. See Figure 7.6 for all other comparisons across provider type regarding instructional emphasis.

**Figure 7.6 – Percentage of Classes Placing a “Major Emphasis” on Each of Five Content Areas Across All Provider Types (1997-98)**

CASAS 1998

**Primary Instructional Setting**

Nearly all (87.9%) ABE 321/326 programs were conducted in classrooms, although 9.4 percent received instruction in learning labs, through tutorial, or both. Library literacy programs held the lowest percentage (32.0%) of classes in classrooms indicating higher percentages of classes taught through tutorial or in a combined tutorial and learning lab setting (44% and 24% respectively).

### Primary Physical Setting

The majority (56.7%) of classes were held at adult schools; 11.4% were held at community colleges; 8.7% were held at correctional facilities; and 6% were held at high schools. All providers held classes in settings consistent with the type of agency they represent. For example, library programs held a majority (64.0%) of their classes at libraries; adult school providers held a majority (76.7%) of their classes at adult schools, etc. See Figure 7.7 for a complete listing of class setting by provider type.

**Figure 7.7 – Percentage of Classes Held in Various Settings Across Provider Type (1997-98)**

CASAS 1998

# What Was the Program, Learner, and Goal Attainment Information For the State Agency Population?

*Chapter Eight provides information about program services, individuals served, and goal attainment in four state agency ABE 321/326 programs: the California Department of Corrections (CDC), the California Youth Authority (CYA), the California Department of Developmental Services (CDDS), and the California Conservation Corps (CCC).*

### Data Highlights

- Sample data representing 6,647 learners was provided by programs in 4 state agencies; California Department of Corrections, California Youth Authority, California Department of Developmental Services, and the California Conservation Corps.
- The majority (78.4%) of learners were enrolled in ABE programs and ESL programs (20.9%).
- More male learners (86.4%) were represented in state agency ABE 321/326 programs overall.
- The highest proportion (34.3%) of learners were between the ages of 21 and 30, and Hispanic (49.1%).
- Education was the most frequently cited (48.4%) primary reason for enrollment among state agency learners.
- The majority of learners (63.6%) were retained at the same level of instruction after 75 to 120 hours of instruction.
- Improved communication skills was the most frequently noted (35.3%) result after 75 to 120 hours of instruction by state agency learners.
- Learners in state agency ABE programs averaged 224.6 on the CASAS reading assessment, compared to 222.7 in the local program sample.
- Reading learning gains between pre- and post-test for learners in the state agency ABE programs were, on average, 5.1 points on the CASAS scale.

## BACKGROUND

### State Agencies

The state agencies included in this chapter receive ABE 321/326 funding to provide basic literacy and English as a Second Language services to the adults enrolled in their programs throughout the state. While funding is distributed to the sites by each state agency, each site is treated independently for data collection purposes.

The California Department of Corrections (CDC) has adult education programs in 32 state prisons, of which 25 submitted data. Inmate attendance in adult education is mandated by the CDC for those who are functioning below a ninth-grade level.

The California Youth Authority (CYA) has programs in 12 state schools. The programs in these schools are designed for youth between the ages of 17 and 25 who have been sentenced by the courts. For most of these learners, attendance in the education program is mandatory. All of the 12 CYA schools participated in the data collection for 1997-98.

The California Conservation Corps (CCC) serves learners 18 to 23 years of age in employment and education programs in 15 camps and urban sites. Twelve of the sites contributed data for 1997-98.

The California Department of Developmental Services (CDDS) offer programs at nine sites, of which some are hospitals and others are developmental centers. Each CDDS site specializes in a different program area. The adult schools, community college districts, and community-based organizations provide special education programs that focus on literacy, independent living, and employability. Data from individuals enrolled in classes serving learners with special needs will be discussed in Chapter 9.

## PROGRAM, LEARNER, AND GOAL ATTAINMENT INFORMATION

### Program Information

Information on learners' instructional program was gathered on Entry Record forms. State agency ABE 321/326 programs provided information on a total of 6,647 learners. Of these, 78.4% were enrolled in ABE programs, 20.9% were enrolled in ESL programs, and less than one percent were enrolled in ESL-Citizenship programs (see Appendix G). This differs significantly from California's ABE 321/326 programs as a whole, where only 15.7% were ABE learners, 73.9% were ESL learners, and 10.4% were ESL-Citizenship learners (see Figure 2.1).

The vast majority (80.4%) of learners in state agencies were served by the California Department of Corrections. An additional 7.6% were served by the California Youth Authority, and the remaining 12% were split between the California Conservation Corps and the California Department of Developmental Services (see Figure 8.1).

**Figure 8.1 – Percentage of State Agency Learners Served by Each Provider Type (1997-98)**  
(N=6,647)

All CDDS learners and nearly all (99.7%) CCC learners were enrolled in ABE programs. The California Youth Authority enrolled the highest proportion of ESL learners (45.1%) followed by the CDC (21.7%). See Figure 8.2 for all other comparisons.

**Figure 8.2 – Percentage of State Agency Learners in Each Program Across Provider Type (1997-98)**

### Learner Information

Learner information was provided by learners on Entry Record forms, and included learners' gender, age, ethnic background, native language, highest degree earned, number of years of school completed, and reason for enrollment.

### Gender

The majority of learners enrolled in state agency ABE 321/326 programs were male (86.4%). Males were more frequently represented in each of the four state agencies with percentages ranging from 75.1% served by the CYA to 99.6% served by the CDDS (see Table 8.1). Females were most heavily represented in CYA programs (24.9%). The ratio between men and women was significantly different from that of the total ABE 321/326 population, where females constituted 58.6% of all learners.

**Table 8.1 – Gender and Age Distributions Among ABE 321/326 State Agency Learners (1997-98)**

	CDC		CDDS		CYA		CCC		Total	
	N	%	N	%	N	%	N	%	N	%
<b>Gender</b>

CASAS 1998

**Age**

The largest proportion of ABE 321/326 state agency learners were between the ages of 21 and 30 years (34.3%). Coupled with learners between the ages of 31 and 40, a total of 66.2% of all learners are represented. Learners in CCC and CYA programs were younger than those enrolled in other programs: 64.4 percent of CCC and 82.2% of CYA were between 15 and 20 years of age, which is in keeping with their regulatory mandates (see Table 8.1). CDDS programs served the oldest population of students with 34.5% over the age of 40. See Figure 8.3 for all other age comparisons.

**Figure 8.3 – Percentage of Learners within Each Age Group Served By Each Provider (1997-98)**

**Figure 8.4 – Percentage of State Agency Learners Within Each Ethnic Group Served by Each Provider Type (1997-98)**

**Ethnic Background**

Hispanic learners were more highly represented (49.1%) among those served by state agencies. Blacks constituted 25.0 percent and whites 16.4 percent of all state agency learners (see Appendix G). As seen in Figure 8.4, Hispanics were most highly represented in CDC and CYA programs (52.3% and 61.6%, respectively), whites were more highly represented in CDDS and CCC programs (44.4% and 37.1%, respectively). See Figure 8.4 for all other comparisons.

**Native Language**

The majority (52.2%) of learners in California’s state agency ABE 321/326 programs spoke English as their native language, while 41.7% spoke Spanish. Not too surprising, the pattern of native language findings followed that of ethnicity across provider type: CDC and CYA had more Spanish speakers while CDDS and CCC presented more native English speakers (see Appendix G).

**Highest Degree Earned**

An overwhelming majority (76.0%) of ABE 321/326 learners reported having no high school diploma or higher degree. This was true for all four state agency programs: 81.4 percent of CDC learners, 36.2 percent of CDDS learners, 73.0 percent of CYA learners, and 49.3 percent of CCC learners. CCC learners reported similar percentages having either a GED certificate or High School diploma (50.0%), however, a higher percentage of CDDS learners reported having higher degrees (see Appendix G).

### Years of Education

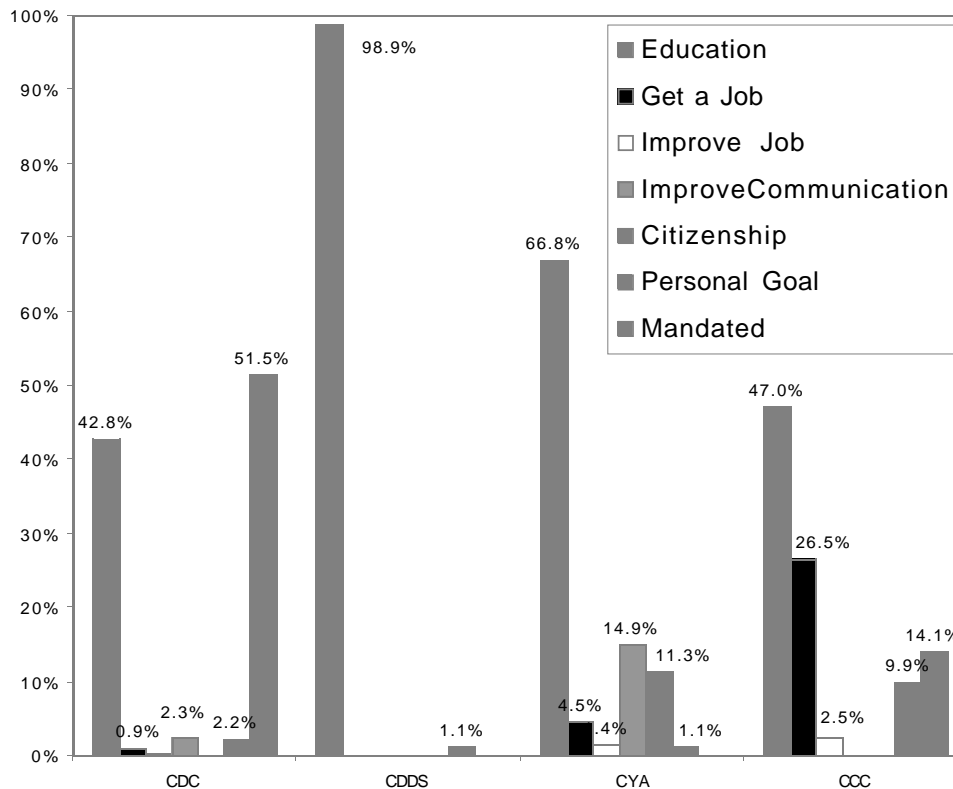

The majority of learners (54.8%) had between 7 and 11 years of schooling. CYA and CDC programs served learners with the fewest years of education. Nearly sixty-three percent (62.8%) of CYA learners and 55.3% of CDC learners reported nine years or less of education. This is not too surprising given the age restrictions of learners at the CYA and the context within which CDC programs are offered. CCC programs served learners reporting more education with over 90% having at least 10 years of schooling (see Appendix G).

### Primary Reason for Enrollment

The primary reason learners enrolled in state agency ABE 321/326 programs was education: 48.4 percent of learners overall, 42.8 percent of CDC learners, 98.9% of CDDS learners, 66.8% of CYA learners, and 47.0% of CCC learners. Of those learners whose primary reason for enrollment was to get a job, 60.5% were served by CCC programs. This is consistent with the employment focus of CCC programs (see Appendix G).

Of the seven primary reasons for enrollment, “mandated” was the second most frequently endorsed by state agency learners. Forty-two percent of learners overall considered themselves mandated to participate in their programs: 51.5% of CDC learners and 14.1% of CCC learners. Interestingly, no CYA learners considered themselves mandated to attend their programs when in fact, this is the case in most instances. See Figure 8.5 for all other comparisons.

**Figure 8.5 – Percentage of State Agency Learners Reporting Their Primary Reason for Enrollment Across Each Provider Type (1997-98)**  
(N=4539)

CASAS 1998

## Goal Attainment

Information on goal attainment was gathered on update and test record forms after 75 to 120 hours of instruction. Some information was provided by learners, some by instructors, and some from learners' assessment results on pre- and post-tests. Information covered learners' progress, results, pretest scores, and learning gains.

## Learner Progress

The majority (63.6%) of learners were retained at the same level of instruction after completing 75 to 120 hours of instruction. An additional 18.1% left before completing their level, 3.3% changed programs, 2.0% completed the level they started, and 12.9% moved up to a higher level (see Appendix G).

Among the three state agencies CDC and CYA learners presented significantly higher percentages of learners remaining at the same level (66.1% and 77.1%, respectively) than learners served by the CCC (8.7%). Since the majority of CDDS learners submitted data indicating instructional hours greater than 120, CDDS learners were not included in this analysis due to insufficient data. Seventy-six percent of CCC learners reported moving up to a higher level during the instructional period. More learners in CDC and CYA programs reported leaving their program prior to completion or meeting their personal goal (19.6% and 13.3%, respectively). It is important to note that learners in CDC and CYA programs have little or no control over when they leave their programs. See Figure 8.6 for all other comparisons.

**Figure 8.6 – Percentage of Learners Within Each Level of Progress Across Each Provider Type (1997-98)**

- CDDS learners were not included in the analysis due to insufficient data.

### Learner Results

The largest percentage (35.3%) of learners in state agency programs reported an improvement in their communication skills after 75 to 120 hours of instruction. Among CDC learners, 27.5% reported increased skills, while 63.9% of CYA learners and 71.4% of CCC learners reported increased abilities in communication. The second most reported outcome was meeting a personal goal (14.1%). Over seventy-three percent (73.8%) of learners in CCC programs reported meeting their goal, followed by CYA learners (25.0%) and CDC learners (6.8%). Overall, CCC learners reported more learning outcomes than learners in other programs with the exception of those outcomes related to citizenship acquisition. See Table 8.2 for all other comparisons.

**Table 8.2 – Percentage of State Agency Learners Reporting Various Outcomes Across Each Provider Type (1997-98)**

	CDC	CYA	CCC	Overall %
<b>Got a Job</b>	1.8%	2.8%	7.1%	2.3%
<b>Advanced in Job</b>	0.0%	4.2%	64.3%	5.3%
<b>Entered Job Training</b>	1.3%	1.4%	14.3%	2.3%
<b>Entered Apprenticeship</b>	0.0%	0.0%	4.8%	0.4%
<b>Entered Post Sec. Ed.</b>	0.0%	0.0%	52.0%	3.9%
<b>Passed Citizenship Test</b>	0.0%	2.8%	0.0%	0.4%
<b>Received Citizenship</b>	0.0%	2.8%	0.0%	0.4%
<b>Registered to Vote</b>	0.0%	0.0%	14.3%	1.1%
<b>Met Personal Goal</b>	6.8%	25.0%	73.8%	14.1%
<b>Improved Communication Skills</b>	27.5%	63.9%	71.4%	35.3%
<b>Read More to Child</b>	0.0%	0.0%	2.4%	0.2%
<b>More Involved in Child's School</b>	0.0%	1.4%	2.4%	0.4%
<b>Earned Certificate</b>	1.0%	0.0%	45.2%	4.2%

CASAS 1998

- CDDS learners were not included in the analysis due to insufficient data.

### Pretest Scores

Learners in state agency ABE programs averaged 224.6 on the CASAS reading assessment, compared to 222.7 in the local program sample. Learners in CCC programs scored higher on the reading assessment on average (226.4), followed by CDC and CDDS learners (both scoring an average 224.6) with CYA learners scoring least favorably (219.1). Overall, a greater percentage (37.5%) of learners scored 230 or above on a reading pretest. Learners scoring above 230 on a reading pretest may still maintain eligibility for ABE 321/326 program participation if their subsequent math pretest scores are below the 230 benchmark. It is likely that learners scoring above the 230 benchmark on the reading test were administered another skill test (such as math) and they scored below 230 in the other skill area. Learners who score below the 230 benchmark in any skill area are eligible for ABE 321/326 funding. See Table 8.3 for comparisons across provider type.

**Table 8.3 – ABE Reading Pretest Scores  
Across Each Provider Type (1997-98)**

ABE Reading Pretest Score Range	CDC (N = 2153)		CDDS (N = 250)		CYA (N = 75)		CCC (N = 223)		Overall (N = 2701)	
	Mean	%	Mean	%	Mean	%	Mean	%	Mean	%
< 200	190.1	7.7	191.1	14.8	196.3	4.0	195.0	1.3	190.4	7.7
201-210	205.7	6.9	204.8	6.0	205.0	8.0	206.3	8.1	205.7	7.0
211-220	216.3	16.3	215.9	12.0	216.4	44.0	216.6	21.1	216.3	17.0
221-229	225.2	31.0	224.8	23.6	225.4	38.7	225.0	33.6	225.1	30.8
230+	238.0	38.1	240.9	43.6	234.3	5.3	239.0	35.9	238.4	37.5
<b>Overall</b>	<b>224.6</b>	<b>100.0</b>	<b>224.6</b>	<b>100.0</b>	<b>219.1</b>	<b>100.0</b>	<b>226.4</b>	<b>100.0</b>	<b>224.6</b>	<b>100.0</b>

*CASAS 1998*

Reading pretest scores for ESL learners were provided primarily by those served in CDC Programs (97.7%). Due to the lack of data provided by other state agencies, only CDC learner scores will be presented.

ESL learners in CDC programs averaged 206.2 on the CASAS reading pretest. The highest percentage of learners (35.3%) scored below 200, followed by those in the 201-210 range (24.5%), those in the 211-220 range (22.6%), those in the 221-230 range (12.9%), and finally those scoring 230 or above (4.7%).

### **Learning Gains**

Learning gains for ABE were computed using the difference in pre- and post-test scores after 75 to 120 hours of instruction had occurred. Caution should be exercised when interpreting learning gains as sample sizes for agencies other than the CDC were very small (CDC- N=180; CDDS- N=22; CYA- N=11; CCC- N=11).

Reading learning gains between pre- and post-test for learners in the state agency ABE programs were, on average, 5.1 points on the CASAS scale. CCC learners evidenced the highest gains (6.9 points), followed by CDDS learners (5.9 points), CDC learners (5.0 points), and lastly, CYA learners (4.0 points) (see Appendix G).

## What Was the Program, Learner, and Goal Attainment Information For the Special Education Population?

*Chapter Nine provides information about program services, individuals served, and goal attainment for the California special education population. Data in this chapter are included for individuals who:*

- *Indicated “special education” in the special program box on the entry form;*
- *Received services from the California Department of Developmental Services; or*
- *Took one of the CASAS assessment tests specifically designed for the special education population (Test Forms 2A, 3A, or 4A).*

*Because many special education learners remain in their programs year after year, the time frame for collecting the data found in this chapter may differ from that used for the data found in prior chapters.*

### **Data Highlights**

- Most special education learners were served by either adult schools (49.7%) or the California Department of Developmental Services (39.3%).
- The majority of special education learners were male (58.1%) and most were between the ages of 31 and 40 (30.1%).
- Whites were most heavily represented (67.1%) followed by Hispanics (18.4%) and Blacks (8.4%).
- Almost 84% had not received a high school diploma or GED certificate.
- The most frequently cited reason for enrollment was a personal goal (35.5%).
- Eighty-four percent of special education learners were retained at the same level of instruction from entry to update record completion.
- Reading learning gains from pre- to post-test averaged 3.13 points on the CASAS scale among special education learners.

### **PROGRAM INFORMATION**

Information on learners serving special education learners was keyed in with the entry, update, and test records submitted.

#### **Provider Type**

Most special education learners were served by either adult schools (49.7%) or the California Department of Developmental Services (39.3%). The remaining learners were served primarily by community-based organizations (6.0%) and community college districts (4.4%). Figure 9.1 illustrates the distribution of learners across provider type.

**Figure 9.1 – Percentage of Special Education Learners Served by Each Provider Type (1997-98)  
(N=4,455)**

CASAS 1998

The CDDs offers programs at nine sites, of which some are hospitals and others are developmental centers. Each CDDs site specializes in a different program area. The adult schools, community college districts, and community-based organizations provide special education programs that focus on literacy, independent living, and employability.

**LEARNER INFORMATION**

Learner information was provided by learners on entry record forms and covered learners' gender, age, ethnic background, native language, highest degree earned, number of years of school completed, and reason for enrollment.

**Gender and Age**

The majority of special education learners were male (58.1%). Most special education learners were either between the ages of 31 and 40 (30.1%) or 41 and 50 (28.9%). See Table 9.1 for all other comparisons.

**Table 9.1 – Percentage of Special Education Learners by Gender and Age Group (1997-98)**

Gender	N	%
Male	2587	41.9%
Female	1862	58.1%
<b>Total</b>	<b>4455</b>	<b>100.0%</b>
Age		
<18	3	0.1%
18-20	68	1.6%
21-30	761	17.7%
31-40	1294	30.1%
41-50	1242	28.9%
51-60	552	12.9%
>60	372	8.7%
<b>Total</b>	<b>4292</b>	<b>100.0%</b>

CASAS 1998

### Ethnic Background and Native Language

The majority of special education learners were white (67.1%). Hispanic and black learners were the next groups most heavily represented (18.4% and 8.4%, respectively). The vast majority of learners reported English as their native language (84.4%). Spanish was the only other native language endorsed by a significant percentage of learners (11.3%) (see Appendix H).

### Education

Few special education learners had any education credentials. Almost 84% had received no high school diploma or higher degree (see Figure 9.2). Regarding years of education, most learners reported very little formal education. Sixty-one percent reported fewer than 4 years of education, though a substantial minority (25.6%), had received 12 or more years (see Appendix H).

**Figure 9.2 – Highest Educational Degree Earned Among Special Education Learners (1997-98)**

### Reason for Enrollment

The most common reason special education learners enrolled in programs was to achieve a personal goal; 35.5% cited this as their primary reason and an additional 33.5 % indicated this as their secondary reason for enrollment. Other common reasons included:

- Communication – 33.6 percent marked this as their primary reason, 13.5 percent as their secondary reason.
- Education – 19.3 percent indicated this as their primary reason, 6.6 percent as their secondary reason.

See Figure 9.3 for percentages across other reasons for special education learner enrollment. See Appendix H for data on secondary reason for enrollment.

**Figure 9.3 – Primary Percentage of Special Education Learners Indicating Their Primary Reason for Enrollment (1997-98)  
(N=4396)**

CASAS 1998

### GOAL ATTAINMENT

Information on goal attainment was gathered on update and test record forms. Some information was provided by learners, some by instructors, and some from learners' assessment results on pre- and post-tests. Information covered learners' progress, results, pretest scores and learning gains.

### Learner Progress

The vast majority (84.4%) of special education learners were retained in their programs at the same level between completion of their entry and update records. Most of these learners remain in the same program for several years. Learners who maintain a level or make small gains are considered successful for this population. Small percentages of learners moved to higher levels (4.0%), completed levels (3.9%), or left before completing their instructional level (2.9%). See Figure 9.4 for all other percentages.

**Figure 9.4 – Percentage of Special Education Learners Presenting Each Level of Progress (1997-98)**  
(N=2844)

### Learner Results

Learners were asked to indicate which outcome (if any) they experienced at the end of the instructional period. Of the various outcomes only three were endorsed by more than 1% of the population; Improved communication skills (23.1%), Met personal goal (18.0%), and Entered job training (2.3%) (see Appendix H).

### Pretest Scores

Most special education learners' literacy skills were assessed with tests specifically designed by CASAS for the special needs population. There are three levels of these tests, each measuring a different life skill literacy level (see Table 9.2). The test labeled 4A is the least difficult, while the test labeled 2A is the most difficult. These tests were individually administered without strict time limits. The examiner marked the answer sheet with the responses indicated by the learners. More than one quarter (26.8%) of special education learners were assessed with the same life skill progress tests (Forms A and B) as were given to ABE and ESL learners (see Table 9.3).

**Table 9.2 – Interpreting CASAS Special Education Scores**

Form 4A	Learners can identify symbols related to independent living.
Form 3A	Learners can read symbols and survival words related to independent living and employment.
Form 2A	Learners can identify phrases and sentences related to independent living and employment.

*CASAS 1998*

**Table 9.3 – Special Education Population Mean Reading Pretest Results (1997-98)**

Reading Levels	Mean	N
AAAA (130-160)	151.1	300
AAA (161-180)	170.9	343
AA (181-190)	185.5	176
A (191-199)	194.9	143
B (200-214)	207.6	157
<b>Total Mean</b>	176.1	119

*CASAS 1998*

The mean reading pretest score for all special education learners was 176.1. The largest percentage (30.7%) tested on assessment Form 3A and had a mean pretest score of 170.9. The next most common assessment used was Form 4A (26.8%); learners using this form had a mean pretest score of 151.1 (see Table 9.3).

### **Learning Gains**

While most ESL and ABE learners were post-tested after approximately 75 to 120 hours of instruction, adult special education learners were post-tested after 121 to 300 hours of instruction. Reading learning gains from pre- to post-test for special education learners averaged 3.13 points on the CASAS scale (see Appendix H).

## Implications of Report Results for Future Data Collection Efforts

Each year a review of the data reveals ways in which the data collection process could be revised and improved. Based on the results of this year's data, the following changes are being made for future data collection efforts:

1. The number of learners in the fall census period will be expanded.
  - For 1998-99 the census period will be from September 1 through October 31, 1998 to increase the number of learners from which data will be collected.
2. The timeline for collecting Student Update Record information will be lengthened.
  - The timeline will be expanded from the current 75-120 hours to collecting update information by March 31, 1999. It is anticipated that an increase in the instructional period will provide a more accurate picture of the learner results that occur during a school year.
3. A Teacher Training Video will be developed and the Coordinator's Manual and Administration Manual will be expanded. A copy of each will be distributed to all agencies.
  - Accurate data is dependent upon standardized definitions and accurate data collection procedures. A Teacher Training Video for viewing by all appropriate agency staff will explain the importance of the data, the uses for the information, and highlight data collection procedures.
  - Additional training emphasis will be placed on key data collection fields, including learner results and the reason a learner may leave the program prior to completion of his/her goal.
4. The *Student Update Record* will be revised to include additional data elements for documenting learner outcomes. Additional data elements will include:
  - a greatly expanded list of learner results categorized under "Work," "Personal/Family," "Community," and "Education,"
  - expanded results include additional work-related outcomes,
  - the ability to indicate if a learner earned a certificate, and
  - the ability to document high school credits earned using a standardized format.
5. Data collection instruments will be administered to document progress in each class the learner attends during the school year. Thus, learner progress and retention can more accurately be documented.
6. Multiple *Student Entry Records* and *Student Update Records* will be available to closely track learner progress over the school year.

### **A Description of the ABE 321/326 Sample Selection Process**

This appendix contains a description of the process for selecting the local agencies that are required to test. Following this description is a list of all of the 1997-98 local testing agencies.

#### **The Sampling Process For Local Agencies**

- 1) A database was used that included the agency name, the number of hundred hour units (HHUs) projected for each agency for SFY 1997-98, and an indication of whether the agency was new to the ABE 321/326 funding and data collection process.
- 2) New agencies are required to test, but their results are not included in the local testing population their first year of participation.
- 3) All ABE 321/326 local agencies, except new agencies, were divided into one of four provider type categories: school district adult schools, community college districts, community-based organizations, and library literacy programs.
- 4) Within each of the four provider types, the top ten percent (determined by HHUs) were designated as "certainty" sample agencies.
- 5) Sampling agencies were requested to pre-test all learners enrolled during a two-week period between September 1 and October 17 and to post-test these same students after 80 to 120 hours of instruction.

### **1997-98 Sample Agencies**

**The following is a list of the ABE 321/326 sampling agencies for SFY1997-98:**

# INSTRUCTIONAL QUESTIONNAIRE FOR ABE 321/326 PROGRAMS

Agency/School Name \_\_\_\_\_

Instructor Name \_\_\_\_\_

1. Agency Number:

2. Class Number:

3. Indicate the emphasis of your instruction during the fall semester.

Instruction	Major emphasis	Partial emphasis	Little/No emphasis
Employability/Workforce Literacy	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Family Literacy	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
General Life Skills	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Citizenship	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Learning to Learn/Study Skills	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other: (specify)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
_____	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
_____	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

4. Primary teaching setting for these students. (Mark one for Instructional Setting and one for Physical Setting.)

<b>4</b>	
<b>Instructional Setting (Mark one only.)</b>	
<input type="radio"/> Learning Center	<input type="radio"/> Tutorial Only
<input type="radio"/> Classroom	<input type="radio"/> Learning Lab <small>(Individual self-paced instruction)</small>
<input type="radio"/> Distance Learning <small>(i.e., Internet, correspondence course, other)</small>	<input type="radio"/> Combination <small>(Tutorial &amp; Learning Lab)</small>
<b>Physical Setting (Mark one only.)</b>	
<input type="radio"/> Adult School	<input type="radio"/> Library
<input type="radio"/> Elementary School	<input type="radio"/> Work Site
<input type="radio"/> High School	<input type="radio"/> CBO Center
<input type="radio"/> Community College	<input type="radio"/> Home
<input type="radio"/> Correctional Institute	<input type="radio"/> Other

**If you indicated your instructional setting as "Distance Learning" or "Tutorial Only" in Question 4, stop here and submit as instructed. Please complete the remainder of the questionnaire if you indicated any other instructional setting.**

5. Time of day class begins:

<b>5</b>
<input type="radio"/> Morning <input type="radio"/> Afternoon <input type="radio"/> Evening (after 5 p.m.)

6. Total number of students present in this class on the day of the post-test.

<b>6</b>
Students at post-test
<input type="text"/> <input type="text"/>
<input type="radio"/> 0 <input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 8 <input type="radio"/> 9 <input type="radio"/> 9

7. Number of hours per week this class meets.

<b>7</b>
Hours per week
<input type="text"/> <input type="text"/>
<input type="radio"/> 0 <input type="radio"/> 0 <input type="radio"/> 1 <input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 2 <input type="radio"/> 3 <input type="radio"/> 3 <input type="radio"/> 4 <input type="radio"/> 4 <input type="radio"/> 5 <input type="radio"/> 5 <input type="radio"/> 6 <input type="radio"/> 6 <input type="radio"/> 7 <input type="radio"/> 7 <input type="radio"/> 8 <input type="radio"/> 8 <input type="radio"/> 9 <input type="radio"/> 9

8. In addition to the primary person who delivers instruction, does this class have an instructional aide or tutor at least once a week?

<b>8</b>
<input type="radio"/> Yes <input type="radio"/> No

9. Do your students use computers as a part of this class?

<b>9</b>
<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't Know

10. If you answered yes to question 9, are these computers linked to the Internet?

<b>10</b>
<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't Know

**PLEASE SUBMIT THIS QUESTIONNAIRE WITH POST-TEST RESULTS ON STUDENT TEST FORMS OR TOPSpro DISKS**
