

Personal and Management (PAM) Skills Portfolio FAQ

Questions from the PAM Overview webinar – January 2018.

<i>If a client opts for the oral presentation, should there be a video or just an audio recording?</i>	Audio alone is sufficient for the recording of the presentation and must be saved electronically. The rest of the PAM portfolio (PPT, resources, citations) must also be saved electronically or on paper.
<i>Can a client choose the PAM if there are concerns that the employment verification may jeopardize their employment?</i>	Yes. Any client may select the PAM option.
<i>Will the NEDP system eventually be able to record the oral presentation option of the PAM?</i>	That update has been requested, but in the meantime, programs wishing to offer their clients the oral presentation option must have their own equipment for recording, saving, and replaying the oral recording.
<i>Can you give suggestions for the types of graphic the client can use?</i>	The client could create a chart or table comparing different brands of refrigerators she's considering purchasing. Another client might create a chart comparing the qualities of a nursing home. Tables or graphs can show comparisons in price, size, distance from the home, etc.
<i>Are there any suggestions for a software app to record the PAM oral presentation?</i>	CASAS/NEDP does not have a specific suggestion or recommendation, other than to check the Apple or Android stores for free recording apps that have received good reviews.
<i>Are the PAM categories on the NEDP Professionals website yet?</i>	Yes, they are under Program Support Materials -> College and Career Competency -> PAM Options at a Glance.
